

Microsoft Teams Phone: 30-Day Jumpstart

Teams Phone is built for the way your hybrid workforce works

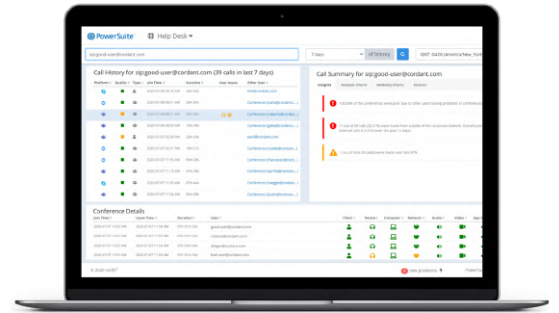

Simplicity is at the heart of the modern workplace. With Teams Calling, get a high-quality integrated calling solution to make and receive phone calls from anywhere and enable people to call, chat, meet and collaborate from a single solution, at the same time.

Teams Calling saves 1.25 hours per week per employee, on average and has a payback period of less than 6 months after going live.*

AVI-SPL elevates your Teams Phone experience and simplifies IT admin

We combine software, consulting, and managed services to help you tackle the toughest challenges across collaboration security and governance, direct routing, and enterprise voice configuration.

Our PowerSuite software for Microsoft Teams provides advanced governance and actionable call quality insights, reducing the time it takes to remediate IT issues.

Turbocharge your transformation to Teams Phone with AVI-SPL

It can be complicated to successfully implement PSTN phone service, especially if you are migrating from an existing service. Leverage our proven success framework on a **small, focused implementation for up to 300 users - up to 3 waves and up to 3 sites, utilizing Calling Plans, Operator Connect, or Direct Routing**, to get the required operational experience and best practices before scaling your Teams Phone implementation.

Our delivery process

Duration: 30 Days Cost: \$25,000

Discover

- Understand the current telephony environment, both from a technical and user perspective.
- Review network topology and assess transformation readiness.

Proof-of-concept

- Acquire the required licenses and configure Teams Voice platform for the pilot users.
- Deploy the solution using Calling Plan or Operator Connect and experience the functionality with a pilot group.
- Activate the trial for AVI-SPL PowerSuite for Day 2 support.

Share

- Socialize the engagement with the leadership and share relevant presentation and metrics
- Share a high-level transformation "roadmap" for full Voice deployment.

With industry's most certified team of engineers and technicians in 50+ locations, AVISPL can help you strategize, design, deploy, manage, and support audiovisual (AV) and unified communications (UC) solutions
