# Backup and digital transformation

---

Data backup and protection issues are gaining importance and urgency. Some questions frequently asked by clients include:

**Will my data be restored when it is lost or corrupted?**

**How to protect mission critical applications?**

**How to take care of short and long-term data retention requirements?**

**How to ensure business continuity in case of incident or emergency?**

# Critical data protection challenges

---

## Data growth

The digital transformation is based on data and information, which is most important resource of today economy. The amount of new data, which needs to be stored and properly protected is growing rapidly.

## Unreliable tapes

Work related to tapes management includes daily efforts to manage, eject, and load tapes into tape libraries. Tape handling is both labor intensive and error prone, with lost tapes posing a serious organizational risk.

## Expensive storage

Together with data growth, the spendings on new storage appliances and facilities are constantly growing. Backup and storage maintenance requires daily operation which is time-consuming and expensive.

# Reliable cloud backup

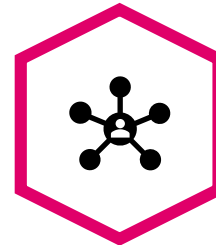

---

Atende Cloud Backup service provides reliable cloud data protection. It is fully managed by Atende. You can forget about tape libraries and expensive storage systems. Your valuable data is always safe and always protected – in the cloud.

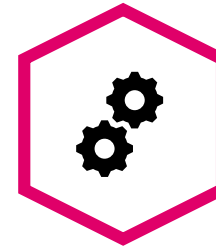

## Reliable offsite data protection

- Convenient offsite protection
- Data encryption at-rest
- Data encryption in-transit

## A simple and integrated solution

- Fully managed solution
- No more need for tapes
- Reliable operation, automatic and verified backup

## Efficient backup and recovery

- Efficient use of bandwidth and storage
- Better data control and safety
- Cost-effective, pay-per-use

# What we protect

---

Atende Cloud Backup service protects a wide range of workloads and applications both from bare-metal servers and virtual environments. It provides granular application level protection for popular database engines, Office 365 service and personal computers.

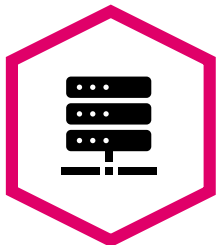

## Database backup

Protect your transact data

## Hyper-V and Vmware VMs

Protect your virtual machines both from Hyper-V and Vmware vSphere

## Bare-metal servers

Protect you bare-metal Windows and Linux Servers

## Desktop and Office 365 protection

Protect data from your desktops and Office 365.

# Atende Cloud Backup and Microsoft Azure better together

---

Microsoft Azure is the foundation of Atende Cloud Backup service. Microsoft builds services that meet the highest standards of security, privacy, compliance and transparency. Atende is responsible for configuring and managing these services properly.

## Compliance and data protection

GDPR, ISO 27001, ISO 27018, HIPAA, PCI/DSS

## Full transparency

Clear view into where the data is stored and secured, including who can access it and under what circumstances.

## Atende managed services

Atende provides services that can help customers meet security and compliance requirements

## Top Azure expertise

The combination of both Azure and Atende services delivers a complete solution.
