# Managed Azure Virtual Desktop

Azure Virtual Desktop – cost savings and more simplicity for Desktop Virtualization use cases

AVD from Azure
Microsoft is responsible for the service infrastructure

Good and Secure user experience
Available from anywhere via internet

### Agile Implementation – simplified maintenance requirements
Speed up your service releases and cut costs

Azure Virtual Desktop is not a turnkey service
– who is going to run it for you?

Microsoft has abstracted the Azure Virtual Desktop technology stack and is responsible for infrastructure and the functionality of the service platform. Eventhough Azure Virtual Desktop is the state of the art Desktop Virtualization technology with significantly less infrastructure to maintain, there are still responsibilities that someone has to take care of

Microsoft

Customer

Virtualization Pane
Web Access, Gateway, Connection Broker, Diagnostics
