

Eastwall’s Well Architect Framework Review

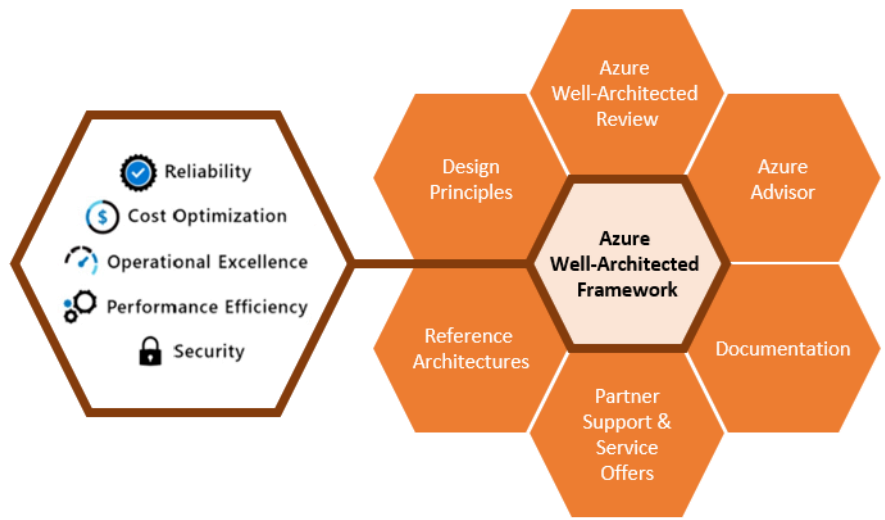

Eastwall’s WAF review engagement model collaborates with your team to review your critical line-of-business application(s) and cloud/hybrid environments against the five key pillars. We evaluate over 60 unique components across all pillars, providing your business with a clear, detailed, actionable assessment and forward path to best practices.

Partnership Approach

Need less, or maybe even more? Eastwall offers engagements between two and six weeks in duration in which your team receives a hands-on experience designing architectures and implementing your unique application & Azure need(s). We work to understand applications & workflows to build mutual expectations around milestones for deployment in your engagement timeframe.

KEY OUPUTS

- Azure **diagrams** of application architecture, landing zones and implementations.
- **Documentation** outputs aligned to all WAF pillars.
- **Outputs** of independent reviews, workshops, automated tooling & surveys.
- High level or **describe backlog** of actionable technical and business tasks to improve technology posture.
- **Executive review** presentation.

Digital & App Innovation
 Azure Infrastructure
 Data & AI

Founded in 2022, Eastwall is a unique professional services firm in the Azure cloud space. We are a **Cloud-focused** Microsoft partner. Our vision is predicated on bettering business outcomes through modern technology implementations and operating models built in the Microsoft Cloud.
