

Unified Security

Coretek leverages Microsoft's robust and native security features to secure your users, servers, data, and applications. Coupled with Coretek's Security Operations Center (SOC), which brings 24/7 monitoring and an "eyes on glass" team of security analysts, you can be sure that you always have visibility and control.

Benefits

Complete Transparency & Ownership

You retain full access to the environment and can view reporting and request an export of data. You own it; Coretek manages it.

Speed, Versatility, & Expertise

As an Azure Expert MSP and top Microsoft Partner, Coretek has experience in high-security verticals and has a deep understanding of the Microsoft security stack to help speed technology adoption for your organization.

Scalability

Our solution is a holistic approach to security, and our service is built to scale with a dynamic threat landscape.

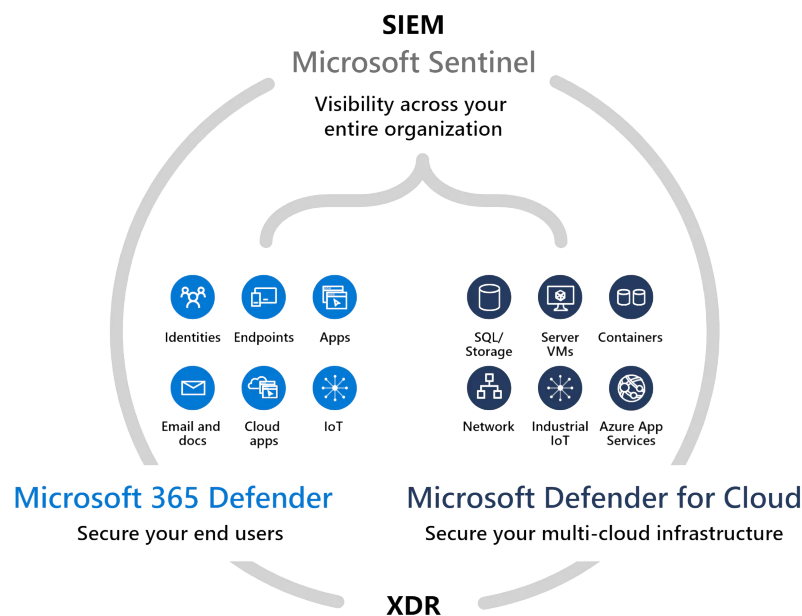

"Always On" Partner

Coretek provides a 24/7, always-on Security Operations Center that knows how to guide you if a security event occurs.

Unified Security Solution Scope

- Manage Microsoft Defender for Endpoints
- Manage Microsoft Defender for Servers
- Monitor Sentinel for events throughout the entire security landscape.
- Correlate and evaluate security events to determine if events are positive/false positive.
- Lead remediation effort if a security event is contained in the Coretek managed environment.
- Support remediation efforts with guidance and expertise if a security event occurs in a client-managed environment.
