

AI Lab allows you to regulate the software used within your organisation

With cloud migration becoming a necessity for business growth, one of the biggest challenges enterprise and governments face is managing and transitioning outdated legacy systems to modern technology stacks, with minimum impact on business performance.

AI Lab is a premium solution from Codebots that unlocks the ability to modernise legacy systems and achieve practical outcomes.

“Codebots is incredibly well suited to legacy migration from a database management system (like Microsoft Access) to a cloud application. ”

 **workingmouse**

Control the Tech Stack

- Have the freedom to create on your preferred technology stack
- Control the finer points of how your application is structured

Dev-Ops Friendly

- You have complete ownership of your source code and hosting
- Integrates with CI/CD pipelines
- Teach a bot to code from an existing Git repository

Easily Update Applications

- Model out the structure of your apps for easy generation
- Change the model as required even when in the midst of developing – without losing custom code

Why people choose AI Lab

- Bots that write high quality code to organisational and security standards
- A clear path to modernising legacy systems that does not cost significant time and effort
- A solution which is easy to maintain and upgrade, thus preventing legacy from occurring again
- Ownership and control over source code
- Control of the technology stack, with the ability to scale to multiple applications

Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.

WHY AZURE

BE FUTURE-READY

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data science tools.

BUILD ON YOUR TERMS

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

OPERATE HYBRID SEAMLESSLY

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single identity platform trusted by 90% of enterprises globally.

TRUST YOUR CLOUD

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cyber security experts, security is foundational for Azure.
