# eDiscoveryPro

Court Innovation Software

The **complete** discovery compliance software solution.

Law Enforcement Portal

- Law enforcement personnel sign into the Law Enforcement Portal and create a case using a simple-to-use form that guides them through the process.

- Law enforcement personnel upload reports, photos, videos, and other case-related files by dragging/dropping or selecting using the file picker.

- Law enforcement personnel can sign-in later to quickly add additional files to an ongoing existing case.

District Attorney Office Portal

- DA personnel review incoming law enforcement files and associate them to prosecution case.

- Files uploaded via the law enforcement portal automatically become part of the prosecution case.

- DA personnel use a simple process to create and send discovery packages to appropriate defense attorneys. Discovery packages are accessible for download via the secure defense attorney portal.

Defense Attorney Portal

- Defense attorneys receive an email notification whenever a new discovery package is available for them to download.

- Defense attorneys sign into the Defense Attorney Portal simply by clicking the link in the email notification.

- Defense attorneys download their client's discovery package by simply clicking the package from a list of available packages.
