

Building Team Extensions Around the Globe

Akvelon - Oracle2PostgreSQL Migration Solution

Akvelon have helped startups and Fortune 500 Companies alike drive innovation, productivity, and business performance since 2000. Akvelon has developed personalized teams that can handle any tech project. Our team is made up of over 850 experts across technologies, with extensive experience building Enterprise, CRM, LOB, Cloud, AI and Machine Learning, Cross-Platform, Mobile, and other types of applications customized to our clients' needs and processes. Over the years, Akvelon have had the pleasure of working with some of the best companies across the globe.

What we offer

Akvelon Migration Toolkit is an instrument to assess and migrate Oracle to PostgreSQL. Automatic Assessment report helps migration team to evaluate Oracle schema complexity and points out major migration risks. Akvelon Migration Toolkit does PL/SQL to PL/pgSQL automatic code translation and help the team reduce efforts for application conversion.

Akvelon Migration consultants use Automatic Assessment report to evaluate the infrastructure requirements and help customer to build efficient solution architecture on Azure. With prebuilt ARM templates Akvelon Migration Toolkit helps to quickly deploy test and production environment with Azure PostgreSQL.

Akvelon solution increases automation score to 70% for Oracle schema of average size and reduces manual effort for PL/SQL rewrite.

Akvelon migration team helps customer to configure secure and cost-efficient solution on Azure. With Azure Monitoring migration team and customer's SREs will have alerts when there are failed scripts. Azure DevOps Server helps to deliver fixes of failed queries fast way to production environment.

What our customers are saying

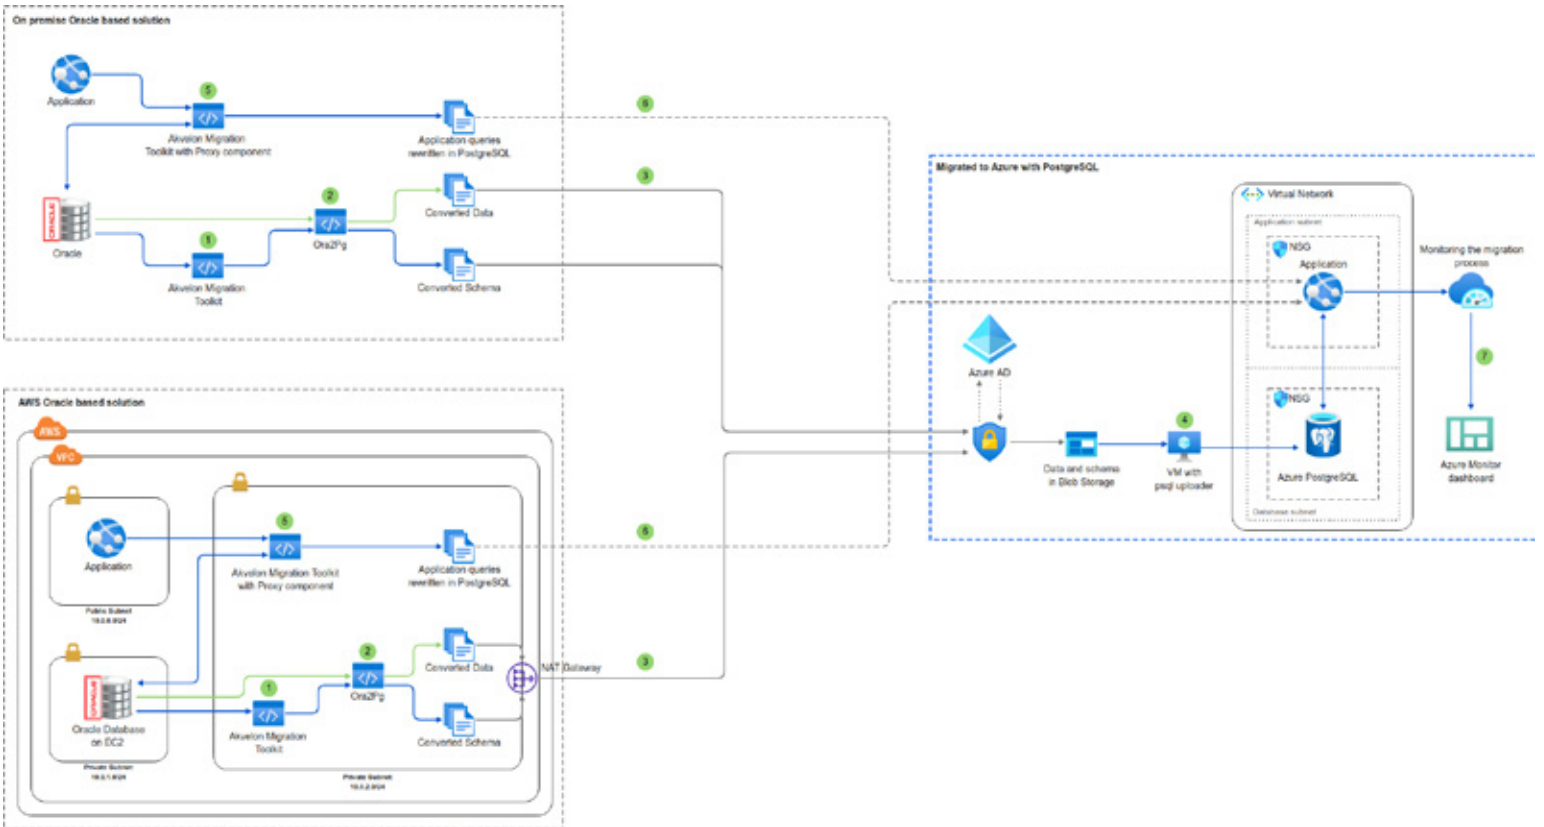

"We engaged Akvelon to provide us with engineering services on numerous complex projects over the past several years. What impressed us the most was the willingness of Akvelon's engineering team to clarify the problem we were asking them to solve and to propose alternate solutions that resulted in better technical and business outcomes, ultimately at a lower cost thanks to the rework we avoided. Our collaboration with Akvelon has been a true partnership."

– Director of Product Management, Software Company

Microsoft Azure

Why Azure

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data science tools.

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single identity platform trusted by 90% of enterprises globally.

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cyber security experts, security is foundational for Azure.
