

# “LoVo gives your voice to Teams”

LoVo’s cloud solution allows you to use of wireline phone anywhere you are. With LoVo and Teams, you gain access to advanced telecommunications services without the need to incur infrastructural costs, and you can create a true remote workplace.

With LoVo and Teams you can reduce the cost of all calls by at least 30% and bring down the cost of telecommunication infrastructure to 0.

1. Create a true remote intuitive workplace, make and receive calls to your landline from anywhere.
2. No infrastructure or evolution cost.
3. Modern state-of-art and constantly evolving telephony included in Microsoft Teams.
4. Security provided by Microsoft.

## Create a true remote intuitive workplace

Teams provides both employee mobility (they can answer work calls in the home office) and the ability to build an advanced IVR. You can answer calls on cell phones and other terminals without being bound to a desk phone, which also gives mobility within the office.

## Optimization of costs and administration

All calls are managed by one operator, LoVo, instead of separate operators in each country or office. The whole administrative interface is transferred to Teams, which gives a huge operational improvement. Transferring your current numbering to Teams is simple, cost-effective, and provides significant operational benefits.

## Digitization of telecommunications is a total absence of hassles such as

Infrastructure of classical fixed telephone exchanges - examples of operating costs. Cost of purchasing telecommunications equipment:.. Cost of Hardware, Cost of Software. Operating costs, Configuration costs. Costs of external services,. Costs of utilization.

*Teams provides both employee mobility (they can answer work calls in home office and the ability to build an advanced IVR. You can answer work number calls on cell phones and other terminals without being bound to a desk phone, which also gives mobility within the office..* **Mateusz Borkowski, Head of Global IT and Digital Strategy**

# Calling from a fixed number with Microsoft Teams requires migrating and digitizing classic and fixed infrastructure to the cloud in Microsoft Teams.

## Infrastructure of classical fixed telephone exchanges - examples of operating costs after migration and digitization to the cloud

Cost of purchasing telecommunications equipment = 0,00 Euro

Cost of Hardware - 0,00 Euro

Cost of Software - 0,00 Euro

Operating costs - 0,00 Euro

Configuration costs - 0,00 Euro

Costs of external services - 0,00 Euro

Costs of utilization - 0,00 Euro.

The only costs are:

1. a Microsoft license to enable calling – Phone System or migration of the Enterprise license to Number 5.
2. minutes as part of the call packages locally in the country, to Europe, the World.

**Calling with Microsoft Teams has no investment barriers.**

**No need to buy hardware, software.**

**Microsoft's ecosystem is counted among the most secure cloud solutions in the world.**

**Virtual PBX is constantly expanded with additional functionality without additional costs for users.**

1. **Mobile Remote Workstation.**
2. **Digitization and cloud in telecommunications.**
3. **Cost optimization.**
