

# Microsoft Teams for your Telecom

## We are experts in custom options and implementation

### Flexible Global Calling Plans and Feature Rich Conferencing

Microsoft Teams offers a wide variety of domestic and international calling plans designed to meet the most common business needs. Organizations have the option of transferring telephone numbers to Office 365 for one simple invoice or staying with their current telephone company.

ConvergeOne has the consulting experts to design and implement all the options Microsoft Teams now has for telecom services. This includes being one of the first global partners with the expertise to implement the new **Microsoft Teams Operator Connect** option available from many major telecommunications partners. We are the leaders in the collaboration and telco areas in Microsoft Teams.

Additionally, Microsoft Teams provides enterprise class conference calling features (voice, video, screen sharing, and more) for far less than other products. Features include:

- on-demand and scheduled unlimited conference calls
- simple web browser joining
- dial-in joining from local numbers
- 800 number access
- call recording
- live closed-captioning
- live translation and transcription to over 64 languages
- and hundreds more features

### ConvergeOne WAVES Immersion Experience – The First Step

Let our digital workplace architects who specialize on the latest generation of Microsoft collaboration products be your digital transformation guide. In a no cost, half-day session, we will facilitate our highly regarded guided workshop about Microsoft Teams telecom experience. As part of this engagement, we will discuss your telecom services and how we can further demonstrate these services within your organization. We want you to see and hear the difference while inspiring you to think about the future of telecom and collaborative services.

### ConvergeOne is Your Trusted Technology Advisor

We have been in business for over 30 years and have engaged with thousands of customers on thousands of technology related solutions. Our company has a long-standing partner relationship with Microsoft focused on their on-premises and cloud products. Our architects focus on the Microsoft Cloud Platform, Cloud Productivity, Collaboration and Content, Enterprise Mobility Management, Communications, and Messaging.

We invite you to view our website for more information about the services we offer, our methodology to identify the right sized business solutions, and the quality of our implementations. When ready, please contact us for more information.
