

WHAT IS AZURE ECONOMIC ASSESSMENT?

The Azure Economic Assessment delivers data-driven insights into opportunities to leverage Microsoft Azure, including an economic study on the benefits of Azure versus on-premise.

WHAT DO WE DELIVER?

High-level Azure Architecture Including Recommended Azure Services

Architecture prototype for selected applications/workloads using best practices for network architecture, security and storage configuration

Application Migration Prioritization and Strategy Recommendations

(Migration Ranking, Heatmap, Modernization recommendations including Container and PaaS Services recommendations)

Application Readiness Assessment

(Application and Database PaaS readiness incl projected remediation strategies)

Optimized Azure Cost Projection incl TCO Analysis

(includes tailored AHUB and RI Options based on existing benefits)

Infrastructure Readiness Assessment

(Server O/S compatibility for both Windows and Linux; Storage type and backup recommendations)
