

CYBERSECURITY AND
CONTINUITY SOLUTIONS

Think Ahead.

TO BE
AGILE

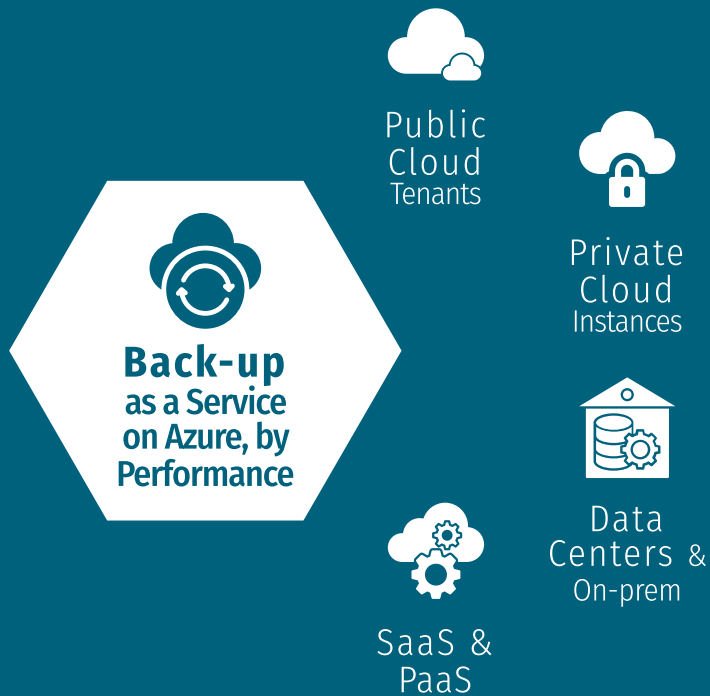

YOU NEED *FLEXIBLE, CLOUD-BASED*

BACKUP

Gold
Microsoft
Partner

- Enterprise—class
- Protect everything
- Use everywhere
- Highly flexible
- Cost efficiency
- Automation focus

A Backup-as-a-Service solution that offers broader, “everything & everywhere”, secure and compliant data protection for the modern enterprise.

Enterprise—class – Provides extensive capabilities, meets today's higher data integrity, privacy, and security standards, and matches contemporary performance demands.

Protects everything – Keep your data and other IT resources safe no matter where they reside—on desktops, mobile devices, servers, virtual machines, or in containers

Use everywhere — You may backup and restore your on-prem, cloud, on the road or at home data securely, seamlessly, and with extensive governance controls.

Highly flexible – Expand dynamically according to demand, with speed and without the risk of hidden costs. Test new configurations, and adapt quickly to new requirements.

Cost efficiency – Reduce operational and capital expenses, improve operational efficiency and maintain your ability to meet service level goals.

Automation focus – Take advantage of the built-in and Microsoft Azure automation capabilities to take your data protection performance and efficiencies to the next level.

TRAITS OF ENTERPRISE-GRADE BACKUP SOLUTIONS

-  Successful* **restore** is key objective
