

Microsoft Teams Rooms Strategy Workshop

4 hours

[Bookmark](#)

[Add to My Picks](#)

The major transition workforces are currently undergoing has many organizations scrambling to implement a more comprehensive collaboration and productivity strategy, especially as it relates to Microsoft Teams, Video and Meeting Rooms. Without the proper tools in place, employees cannot maintain the level of productivity achieved inside the office, which puts the viability of your business at risk.

In this workshop, WWT experts collaborate with your team to uncover challenges and evaluate tool sets that will speed processes, reduce costs and increase productivity within your organization. We show how to simplify the implementation and adoption of Microsoft Teams Rooms and equip your team with a strategic roadmap to rollout, scale and support a meeting room strategy.

What to Expect

In a technologically unbiased, interactive space, our experts will work with your team to evaluate your current state, discover opportunities for change and compare how solutions or products of interest will impact your environment.

Workshop agendas follow our proven methodology and are tailored to your specific goals; this includes:

- [Review current state of meetings and video environments](#)
- [Review and compare video end point and conference room technology](#)
- [Assess requirements for integrations, interoperability and security](#)
- [WWT offerings for technology selection, testing and deployment](#)
- [Recap and establish priorities for MTR roadmap](#)

Goals & Objectives

Our teams will join forces in analyzing requirements, prioritizing solution features and exploring products through hands-on comparisons--all with the goal of designing the right solution to meet your organization's particular objectives.

What is a workshop?

A workshop is typically a paid engagement, with predefined objectives, that results in the creation of strategic project deliverables: action plan, high-level architectural design, proposal or quote for project implementation. Workshops may be delivered remotely or onsite.

Who should attend?

CIOs and IT directors, Unified Communications and Collaboration leaders, Digital Workspace champions or anyone with a material interest and responsibility for delivering, consuming and supporting video conferencing, collaboration and productivity apps.
