

# Kyndryl Cyber Incident Recovery Services for Enterprise Workloads on Azure

## Customer challenges

Keeping SAP systems secure and resilient has become increasingly difficult for most organizations, with labor-intensive manual processes often leaving security gaps and room for error. Highly distributed IT models from core to edge increase the attack surface and entry points for security breaches, while an overall lack of visibility into application and data environments prevents timely detection and response to data corruption. At the same time, complex, integrated, and interconnected SAP systems and rapidly evolving regulatory environments are making systems even more difficult to secure and adhere to compliance regulations.

## Solution highlights

Kyndryl™ Cyber Incident Recovery Services for Enterprise Workloads delivers an integrated approach to SAP services on Microsoft Azure, combining SAP deployment and management with security, threat management, and recovery capabilities.

- Powerful AI and a world-class Security Operations Center (SOC) to spot threats quickly
- Built-in high availability, disaster recovery, and cyber resiliency for real-time visibility into SAP systems

- SAP management services including automated deployment, security hardening, migration, and ongoing monitoring
- A fully managed cyber resiliency service that provides an orchestrated resilience approach to mitigate the business impact of cyber disruption with rapid recovery

## Customer benefits

Benefits of Kyndryl Cyber Incident Recovery Services for Enterprise Workloads on Azure include:

- 1 Reduced incident detection and response times for operational and security events with AI-enabled delivery platforms
- 2 Real-time visibility into status of SAP systems and any security threats
- 3 Advanced threat detection with event correlation across SAP system logs, Azure Active Directory, and other sources using Azure Sentinel capabilities
- 4 Automation and orchestration for application-aware recovery after a cyber incident
- 5 Data verification and immutability with Azure Blob Storage
- 6 Simplified approach that reduces the need for extensive expertise and makes it easier to deploy and manage multi-tier recovery

# Why Kyndryl and Microsoft?

## About Kyndryl

Kyndryl is a \$19 billion company with skilled professionals operating in over 60 countries. We design, build, manage and modernize mission-critical technology systems that the world depends on everyday.

We have decades of experience working with customers to deliver enterprise-grade workload analysis, migration, implementation, and managed services for the most complex workloads.

### Providing undisputed leadership

**6.1M** mainframe installed MIPs

**300K** network devices managed

**5,200+** WAN devices managed

**3.5M** LAN ports managed

**67K+** VMware systems managed

**14K+** SAP instances managed

**3.5+** exabytes of client data backed up annually

### Azure Advanced Specialization Microsoft

- Kubernetes on Microsoft Azure
- SAP on Microsoft Azure
- Analytics on Microsoft Azure
- Microsoft Azure VMware Solution
- Microsoft Windows Virtual Desktop

### Solution Partner Designations Microsoft

- Solutions Partner for Infrastructure (Azure)
- Solutions Partner for Data & AI (Azure)
- Solutions Partner for Digital & App Innovation (Azure)
- Solutions Partner for Modern Work
- Solutions Partner for Security

### Empowering thousands of customers

**>4,000**

Global customers

... of the Fortune 100 and more than half of the Fortune 500

**20,000+**
