Instant visibility to critical infrastructure health

EcoStruxure™ IT Expert: Efficient use of your time with cloud-based monitoring

EcoStruxure™ IT Expert is a vendor-agnostic, cloud-based monitoring solution for distributed IT edge environments generating a wealth of raw data enabling you to gain greater insights into operational performance, lower mean-time-to-repair and maximize ROI.

What is EcoStruxure™ IT Expert?

EcoStruxure™ IT Expert monitors and protects your critical IT edge equipment, providing 24/7 visibility through live data, smart alarming, predictive failure analysis, and data-driven insights on the health of your connected assets. EcoStruxure™ IT Expert synthesizes performance and alarming data into proactive recommendations, and enables secure, wherever-you-go visibility and control.

Why customers use EcoStruxure™ IT Expert

- Visibility
- Managing assets from different vendors
- Comparisons

Proactive incident management

- Insights into the current and future state of your distributed environment
- Wherever-you-go visibility
- Recommendations on how to proactively handle incidents

Vendor-neutral management

- Centralized management of all networked devices
- Firmware updates
- Configuration changes

Benchmarking

- Comparisons of device performance against those of your peers around the world
- Seamless process
- Insights into key sensors and alarm information

With the EcoStruxure™ IT Expert mobile app, now my staff and I simply look at our phones for easy access to all the devices on our network. Alarms are consolidated according to relevance, enabling us to focus on the devices that are truly affected.

- Alan Silcott, Network Supervisor, Bainbridge Island School District
