Make SQL Server sustainable and secure with Microsoft Azure

About SQL Server Migration Assessment with Coeo

Coeo are proud to be a specialist Microsoft Data & AI partner. We've developed a SQL Server migration process based on Microsoft best-practice, aligned to the Cloud Adoption Framework. Combined with over 15 years of SQL Server expertise, we are the perfect partner to support migrating SQL workloads to Azure.

What we offer

Coeo can kickstart your migration journey to cloud with a SQL Server migration assessment; in-depth discovery and analysis on your current SQL estate, supported by expert consultant advice and guidance.

We work with you to ensure that the migration model and approach suits your business requirements and application dependencies, helping you choose the right Azure SQL technology for both critical and business-as-usual databases.

The SQL Server migration assessment consists of a series of workshops to discover and define workloads in scope for migration. Once, captured this data feeds into a commercial business case report.

The commercial analysis includes a licensing review, Azure cost estimate, cost optimisation opportunities and business case report to establish the total cost of ownership when moving your SQL Server workloads to Azure.

Our team will then provide next steps and recommendations to accelerate your SQL Server migration to Microsoft Azure.

Contact us today to book your SQL Server Migration Assessment

What is included:

- Current state discovery with Azure migrate
- Business requirements workshop
- Application compatibility and feature parity review
- High-level model and migration plan for prioritised workloads
- Azure cost analysis
- Business case report
- Expert guidance on the Azure SQL Family Suite

Why Microsoft Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organisation meet its business challenges. With Azure, your business or organisation has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
