PROSECUTORbyKARPEL is a browser-based case management system that utilizes an easy to use graphical user interface, allowing you to use almost any device, anywhere, including the Cloud.

Built with the latest Microsoft and SQL technologies, your daily tasks will be streamlined with built-in workflows and collaboration features that will save you time and simplify your daily workload.

Criminal Case Management including the following tightly integrated features:

- Document generation and eDiscovery
- Person-centric system that allows a person to be added once and associated with a case by role type
- Easy review of an individual's legal history on a single screen
- Access to all case information, on one non-scrolling screen
- Integration with your judicial community, allowing law enforcement, jails, and courts to share information securely and easily
- Keep paper usage to a minimum, improve accessibility through electronic files
- Integration with Adobe Acrobat Professional for quicker discovery turnaround
- Reports and Ad Hoc reporting to meet your statistical needs
- Hosted locally or in our secure Cloud
