

Azure Government for national security

Trust in ITCO for specialized cloud services that support your mission-critical needs, including infrastructure as a service (iaas), platform as a service (paas), and software as a service (saas).

Azure Blueprints enables cloud architects and core IT groups to define a repeatable set of Azure resources that implements and meets the organization's standards, patterns, and requirements. Azure Blueprints enables development teams to quickly provision and create new environments knowing that they are created in compliance with organizational standards and that they contain a set of integrated components, such as networks, to accelerate development and delivery. Technical drawings are a declarative way to organize the implementation of various resource templates and other artifacts, such as:

Role assignments.

Policy assignments.

Azure Resource Manager templates.

Resource groups

Advance your classified mission

- Bring your data to the cloud with confidence
- Get fast, direct connectivity
- Connect natively to classified networks or leverage options for private, resilient, high-bandwidth connectivity using Express Route and ExpressRoute Direct.
- Discover innovative offerings
- Take advantage of cloud capabilities including infrastructure as a service (IaaS), platform as a service (PaaS), software as a service (SaaS), and marketplace offerings.

Azure Government Secret operates on secure, native connections to classified networks with options for ExpressRoute and ExpressRoute Direct for private, resilient, high-bandwidth connectivity

Direct connection

For agencies with direct connection through classified networks. Azure Government Secret is available natively.

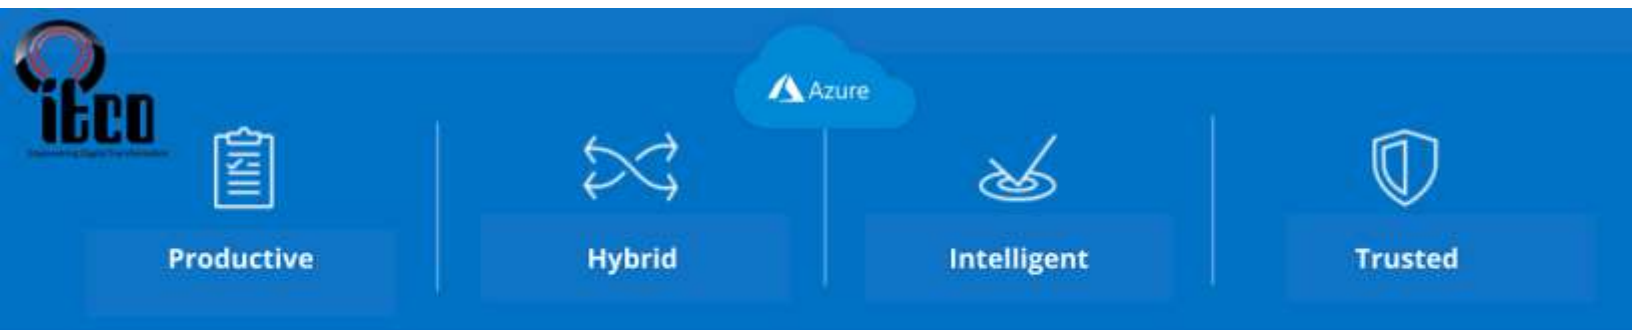

ExpressRoute

Extend your local networks to Azure Government Secret regions through a private connection provided by a connectivity provider with ExpressRoute.

Get the ability to connect directly to Azure Government Secret locations with ExpressRoute Direct.

Be committed to meeting needs across all data classifications

Rely on more than twenty years of experience working in classified networks to support critical customer missions. Microsoft is committed to meeting needs across the spectrum of data classifications while providing specialized agency cloud services and best-in-class security.

Azure Government

Physically separated instance of Microsoft Azure

The only hyper-scale cloud built

Meets the most complex compliance standards

Designed to exceed U.S. government requirements

Supports the broadest selection of services, tools, and languages
