

# Do More With Video Surveillance

“After 12 minutes of continuous video monitoring, an operator will often miss up to 45% of screen activity, and after 22 minutes of viewing, up to 95% is overlooked.”  
OMDIA

- Ø One login, one app
- Ø Find footage from any device
- Ø 100% cloud solution
- Ø Real-time alerts if cameras fall offline
- Ø Instantly share live footage
- Ø Secure remote access on any device
- Ø Bandwidth friendly
- Ø Scale to any number of cameras
- Ø Works with any ONVIF camera

## What if your security cameras provided more than just security?

<p><b>Plug-n-Play</b> Configure any camera to get alerts on specific events</p>	<p><b>Any Device Access</b> Access platform, watch live/recordings from desktop, laptop, iOS and Android using just a browser -- no plugins required</p>	<p><b>User Management</b> Create any number of users and centrally manage their access to specific locations or specific cameras</p>
<p><b>Device Health</b> Regular health check for all your cameras and notifications via email or SMS for device down and up alerts</p>	<p><b>Groups</b> Add different cameras in a group, even from different locations and watch them live together</p>	<p><b>Time lapse Video</b> Create a short clip to see overview of progress/activity from a specific camera in a day</p>

Transform video data into powerful business insights that allow you to strengthen your operations while improving the bottom line.
