

By 2022, Cloud shift across key enterprise IT Markets will increase to 35% according to Gartner, Inc.

Infrastructure Modernization services from ICT

ICT Offers Infrastructure Modernization Services to take your applications and software to the next level of performance and Manageability. We help you drive your organization's IT modernization process through various phases of efficiency and agility with a modular, structure approach.

ICT Approach

The Data Center Migration Consist of 5 pillars performed across the engagement which we modernize your existing Infrastructure and analyze your workloads / applications.

Phase 1: Strategy and Assessment

Establish an understanding of the customer business goal & Objectives to tailor a proper approach and migration framework.

The Assessment will provide a migration roadmap to the customer and define the right methodology to migrate the environment by categorizing the workloads from IAAS to PAAS and SAAS as well as provide a cost saving analysis by optimizing the workloads and move it to the cloud.

Phase 2: Migration

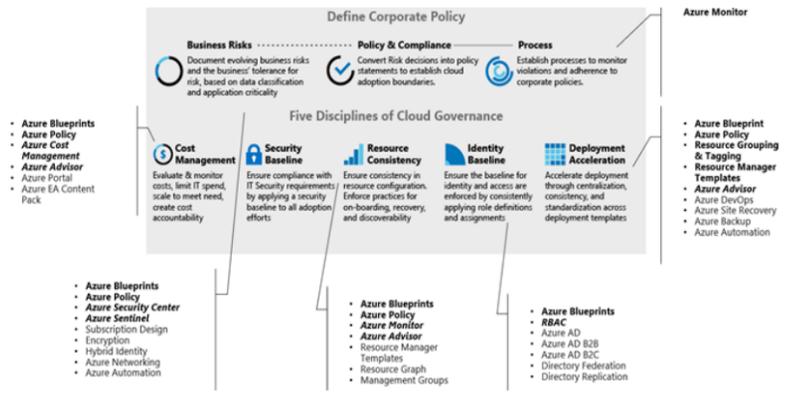

This phase is iterative process for migrating and modernizing the digital estate in alignment with targeted business modernized in alignment with strategy & Pan. A detailed LLD will be provided covering the Landing Zone, Network Design, Storage Design, Compute Design and Data Design, etc..

Phase 3: Secure & Optimization

We are following the best tools to making governance actionable, we have identified five discipline to define corporate policy: cost management – security baseline – Resources Consistency, Identity Baseline, Deployment Acceleration.

Phase 4: Managing

We are helping you to operate and manage your environment and provide you Azure Monitoring offers by introducing Azure Sentinel to our SOC Services. We live and breath the Microsoft Cloud, and we're committed to bringing our goals to life.

Our Offers

INFORMATION & COMMUNICATION TECHNOLOGY W.L.L

- Data Center Assessment
- Application Modernization Assessment
- Data Assessment
- TCO Reports
- Migration Roadmap

Data Center Assessment – Starting 2 Weeks

INFORMATION & COMMUNICATION TECHNOLOGY W.L.L

- Identity Landing Zones
- Native Networking Hub LZ
- 3rd Party NGFW and WAF
- DMZ Landing Zone

Landing Zone Deployment – 1 Week

INFORMATION & COMMUNICATION TECHNOLOGY W.L.L

- Provide HLD and LLD
- Rehost
- Modernize (IAAS To PAAS)
- Refactoring / Rearchitect (Microsoft Services & Containerization)
- Testing and Enrollment

DC Migration – Starting 1 Month

INFORMATION & COMMUNICATION TECHNOLOGY W.L.L

- Review and Adopt Cloud Governance
- Cloud Cost management
- Enable Reservation and Azure Hybrid Benefits
- Enforce Policies to meet business requirements
- Define Security and Identity Baseline
- Deployment Acceleration
- Enable Azure Monitoring

Governance / Optimization – 2 Weeks

INFORMATION & COMMUNICATION TECHNOLOGY W.L.L

- Services Level Assurance
- Monitoring, Optimization, Management and Support Services
- Automated Tasks, issue custom policies.

Managing – Starting 6 Months

INFORMATION & COMMUNICATION TECHNOLOGY W.L.L

- Provide Architecture Consultancy Services

Consultancy – Pay As You Go
