

Cloud Migration – Azure Migrate Solution

First Datacorp prepares for tomorrow's challenges today.

Migrating to the cloud is not just about improving scalability and security. It is also about improving your financial resilience by shifting from a traditional upfront expenditure to a more flexible pay-as-you-go model.

Azure Migrate Service

Azure Migrate provides a centralized hub to assess and migrate to Azure on-premises servers, infrastructure, applications, and data:

- **Unified migration platform.** A single portal to start, run, and track your migration to Azure
- **Range of Tools.** A range of tools for assessment and migration such as Azure Migrate: Discovery and Assessment and Azure Migrate: Server Migration.
- **Assessment and migration.** In the Azure Migrate Hub, you can assess and migrate:
 - Windows, Linux and SQL Server
 - Databases
 - Web applications
 - Virtual desktops
 - Data

A unified approach to cloud migration

With Azure Migrate, all Azure migration tools and guidance are available to plan and implement movement to the cloud—and track progress using a central dashboard that provides intelligent insights.

- **Multiple Scenarios.** Support for key migration scenarios across servers, data, databases, web apps, and virtual desktops
- **Diverse Capabilities.** Comprehensive discovery, assessment, and migration capabilities powered by Azure and partner tools
- **End-to-end visibility.** Centralized migration repository delivering end-to-end tracking and insights
- **Save money.** Cost-efficient migration with Azure cost optimization features and tools
