Your Web apps migration journey to Azure

✓ Assess
↗ Migrate
○ Optimize

Determine if your website is a good candidate for Azure App Service by scanning its public URL – for free and just within a few minutes

Choose your path to the cloud by redeploying your code, containerizing your application, or lifting-and-shifting with migration tools

Take advantage of proactive and intelligent analytics, DevOps practices, or pre-built AI components, to offer an enhanced experience
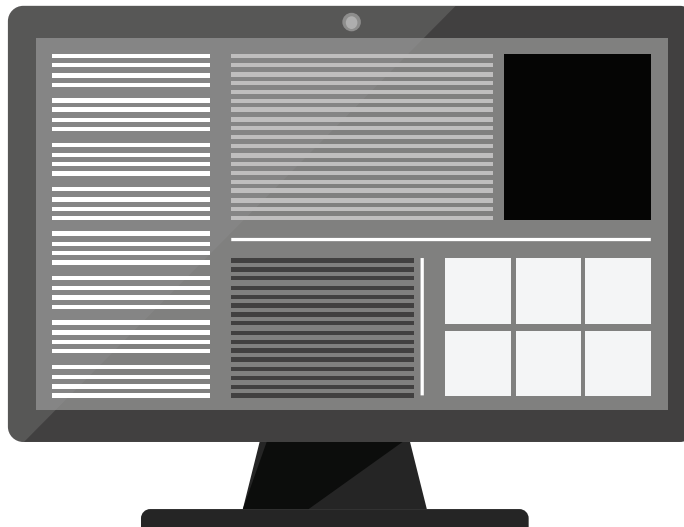

Modern web applications challenges

Digital engagement has evolved greatly beyond static web content – delivering richer interactivity, and functionality

Fast, fluid, and reliable experience

Quick functionality and content updates

Cross-platform engagement

Intelligent customization

Authentication and identity, sensitive data handling

New ways to interact with customers
