

Healthcare Compliance Readiness with Eastwall

Leverage the Azure cloud and Microsoft’s surrounding services to build your healthcare industry compliant solution. **Eastwall** is a Microsoft Partner with decades of industry-relevant experience in healthcare, supporting software vendors and payers/providers in meeting their obligations for audit and compliance. Whether you are seeking 510k approval on a medical device or need to attest your software meets Title 21 CFR Part 11 compliance, our team has the depth of healthcare industry experience and technology acumen to guide your compliance journey.

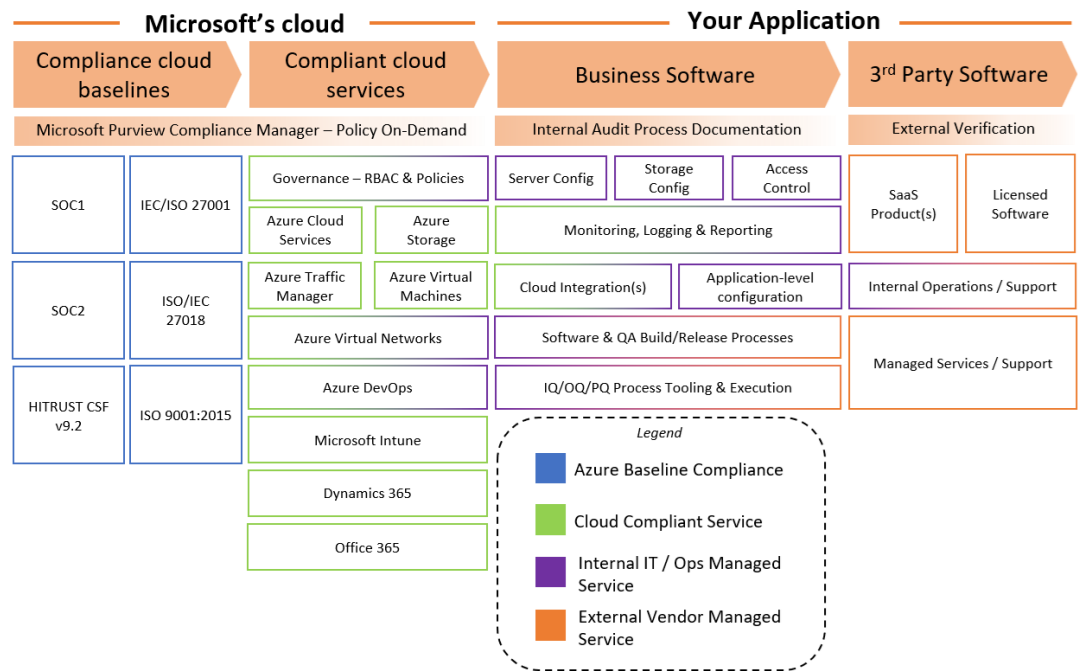

Engagement Methodology*

- Conduct workshops to review compliance & audit requirements, technology services ecosystem and capabilities of Microsoft’s cloud. Design blueprints, address requirements & identify gaps and future hurdles.
- Leverage Eastwall & Microsoft’s library of artifacts, process templates and best-practices to outline current technology gaps & forward-looking remediation plans.
- Build an architecture with configuration outlines that correlate to compliance functional requirements.
- Tailor role-based access controls and authentication to a cloud model for nonrepudiation & compliance with relevant governance policies.
- Understand, document & outline solution integrations with internal and 3rd party software & components.
- Alter architecture and technology components, then adjust the implementation to meet the compliance guidelines agreed upon between Eastwall & your organization.
- Provide visibility to on-demand audit readiness with Microsoft Policy tools.
