

PetaBytz Azure DevOps IaaS

PETABYTZ INFRASTRUCTURE AS A CODE

- PetaBytz Infrastructure as a code helps to deploy the software faster in multiple servers, avoid inconsistencies of software versions in the servers, increase productivity, and lower costs
- It manages the Servers through the Code (Automation programs) instead of manually setting up the software, configurations in the servers, setting up the servers...etc.
- PB IAAC helps to automate the infrastructure software configurations and deployment services .with this we can achieve consistency in the servers, easy to monitor, and reduce human mistakes

Benefits of PetaBytz Infrastructure as a Code

Faster and easy to maintain the servers.

Consistency in configurations on all the servers.

Easy maintenance and reduce risk.

Reduce the cost.

Faster in software deployments and automate repeated tasks.

Tools Used in IaaS Services

Azure Resource Manager

Terraform

Ansible

Chef

Puppet

Vagrant

- PetaBytz IaaS Service helps to get things faster by eliminating manual processes and keeping infrastructure more reliable and consistent
