

KNOWLEDGE MINING & DOCUMENT INTELLIGENCE ACCELERATOR

The Neudesic Knowledge Mining and Document Intelligence Accelerator enables customers to quickly and easily apply AI to business scenarios.

The Accelerator helps organizations take action on immediate opportunities by getting the right information to the right person faster and creating enhanced experiences. By automating the extraction of data and insights from unstructured content, it also greatly reduces the costs of manual content processing.

By leveraging our Accelerator, businesses are able to decrease their time to market by up to 40%.

The Accelerator takes unstructured data through ingestion, enrichment and analysis to provide valuable insights that may be automated and orchestrated into applications such as workflows, business rules, automation, bulk processing and approvals.

The Accelerator delivers outcomes including ...

- **Quicker Time to market**
- Reduces cost of manual processing of content
- **Built In Quality**
- **Repeatable and cost effective tools**

Differentiators from Competition:

- **By leveraging our Accelerator, time to market for AI Knowledge Mining solutions are reduced by up to 40% compared to leveraging Azure services alone.**
- Can be leveraged across all content management systems, including Microsoft Teams
- Can be tailored within any application and to any domain context

Neudesic partners with clients to develop a wide range of knowledge mining solutions that support significant steps in advancing organization's digital business evolution including, but not limited to:

- Line of Business Decision Making
- Compliance and Controllershship
- Automated Document Management
- Legal Contracts Review
- Financial Analysis
- Customer Service and Sales Support
- Business Operations Automation
- Internal Knowledge Management
- Internal Employee Engagement
- Social Media Sentiment Analysis

Customer Benefits include:

- Microsoft Teams integration
- Automated setup and configuration of cognitive services.
- Pre-Built ingestion modules that: crack documents, split documents and extract text

- Pre-Built enrichment modules including: classification, forms recognition, table Extraction Pre-Built Serverless API that encapsulates modules.
- Pre-Built Sample workflow that automates cognitive actions.
- ARM templates for all code component

Neudesic offers Knowledge mining engagements across all industries, with specific strengths in...

We will deliver:

Neudesic has a suite of offerings focused on accelerating an organization’s adoption and development of intelligent applications. From ideation, to build, to run, we are here to drive value to your firm.

Our offerings are based on the current state of the customer’s AI journey and capabilities across...

AI Design Sprints: *Explore, identify and prioritize the best places to begin with bots for driving business value **

3 or 5 day facilitated sessions focused on education and identifying value driven use cases for Knowledge mining and Document Intelligence Automation. At the end of this you will have at least one demonstrable solution concept that can be used to gain shared understanding and executive buy-in.

Proofs of Value Sprints: *Demonstrate how applying Knowledge Mining \ Document Intelligence technologies will solve business problems **

Verify and provide evidence how a knowledge mining \ document intelligence use case concept will produce the desired business objectives and results. Our Proof of Value Sprints focus on quickly creating working code using your data and use cases.

Knowledge mining \ Document Intelligence Implementations: *Built out a knowledge mining \ document intelligence platform and put it to use to support a business value proposition **

Put AI plans into action via a world class bot to enhance your customer or employee experiences and further evolve your digital business. Following agile methodologies we right-size this engagement to accelerate the time to value.

Neudesic is especially skilled at identifying the appropriate enterprise value propositions for Document Intelligence and how best to prioritize implementations for immediate value.

Beyond our technical expertise, Neudesic offers a depth of experience that reaches into our **Business Development Management (BDM), User Experience (UX) practices and Managed Services** to extend business value across organizational AI goals and initiatives. In addition, we also provide specialized expertise in deep integrations, machine learning, cognitive services and intelligent workflow.

Neudesic locations include Irvine, Phoenix, Dallas, Houston, Denver, Chicago, Philadelphia, New York, Atlanta, Portland and Seattle. **Contact us to learn more:** www.neudesic.com (303) 248-8321.
