

Accelerator Workshops

Align stakeholders to accelerate your cloud journey

The Accelerator Workshops for Cloud leverage experience and talent from Leaven and IP from CTP, a Hewlett Packard Enterprise company, curated through hundreds of successful enterprise cloud transformation engagements.

What are Accelerator Workshops?

Every client's journey to cloud is different. Whether you are just starting out or well along the path to cloud transformation, this workshop can help identify your best next-step and provide best practices.

This workshop is built to a client's needs; whether that is bringing peers to a shared understanding, vision, goals and objectives of cloud transformation or performing deep dives into cloud technologies such as DevOps, Security, Big Data, or IoT, it serves as the rallying cry for cloud, and will quickly uncover blockers and put a timeframe around your successful implementation of a cloud transformation programme.

Why customers use Accelerator Workshops for Cloud

In 1-3 days, the workshop can provide the client with a plan for:

- Determining the right workloads for cloud and what to do with them
- Achieving governance and compliance in the cloud
- Managing cloud costs
- Deep-dive into a selected technology
- Aligning business stakeholders around cloud.

Take the right steps

- Determining the right workloads for cloud and what to do with them
- Governance and compliance in the cloud
- Managing cloud costs

Leverage proven experience

Transform quickly
