

# Solutions for Retailers, Food Service & Processors

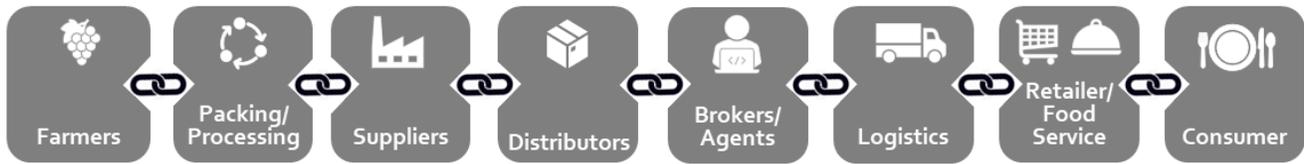

The Agriculture and Food Supply Chain is fragmented, with many contributors and a large geographic reach. The problems are well known:

Limited visibility between links

Production, Sales & Consumption Mismatches

Excess use of financial, human and natural resources

Buyers are challenged by limited visibility into the variables affecting business fundamentals

Increase sales by department, store, region

Improve margins in all categories

Reduce product shrink

Via a customizable dashboard, retailers have access to real-time, regularly updated information which provides needed visibility for better buying and selling decisions.

View the latest data for your selected commodity

Compare your performance to the market

Revise, adjust and react quickly to changes

Explore how **agtools**® gives you the visibility to see more and achieve more. Call us at +1(714)707-4848 or visit us at [www.ag.tools](http://www.ag.tools) to request a live demonstration.
