Simplify. Understand. Act.

Digital Intelligence and Customer Data Platform

Challenges and Opportunities

“Consumer behavior has changed radically in response to the COVID-19 lockdown. Understanding which changes are likely to stick will help companies plan for the recovery.”

– McKinsey, August 2020

STATWOLF

Challenges and Opportunities

“Consumer behavior has changed radically in response to the COVID-19 lockdown. Understanding which changes are likely to stick will help companies plan for the recovery.”

“...many of the longer-term changes are still being formed, companies have an opportunity, if they act now, to help shape **the next normal.**”

– McKinsey, August 2020

Battle plan

Focus on the Customer actions, journey and touchpoints.

Enhance data granularity and connect data and Customer.

Provide meaningful information to the right stakeholder.

Battle plan

Focus on the Customer actions, journey and touchpoints.

Nice!

Enhance data granularity and connect data and Customer.

Provide meaningful information to the right stakeholder.

...but how?

Battle plan

Focus on the Customer actions, journey and touchpoints.

Customer Data Platform (CDP)

Enhance data granularity and connect data and Customer.

Provide meaningful information to the right stakeholder.

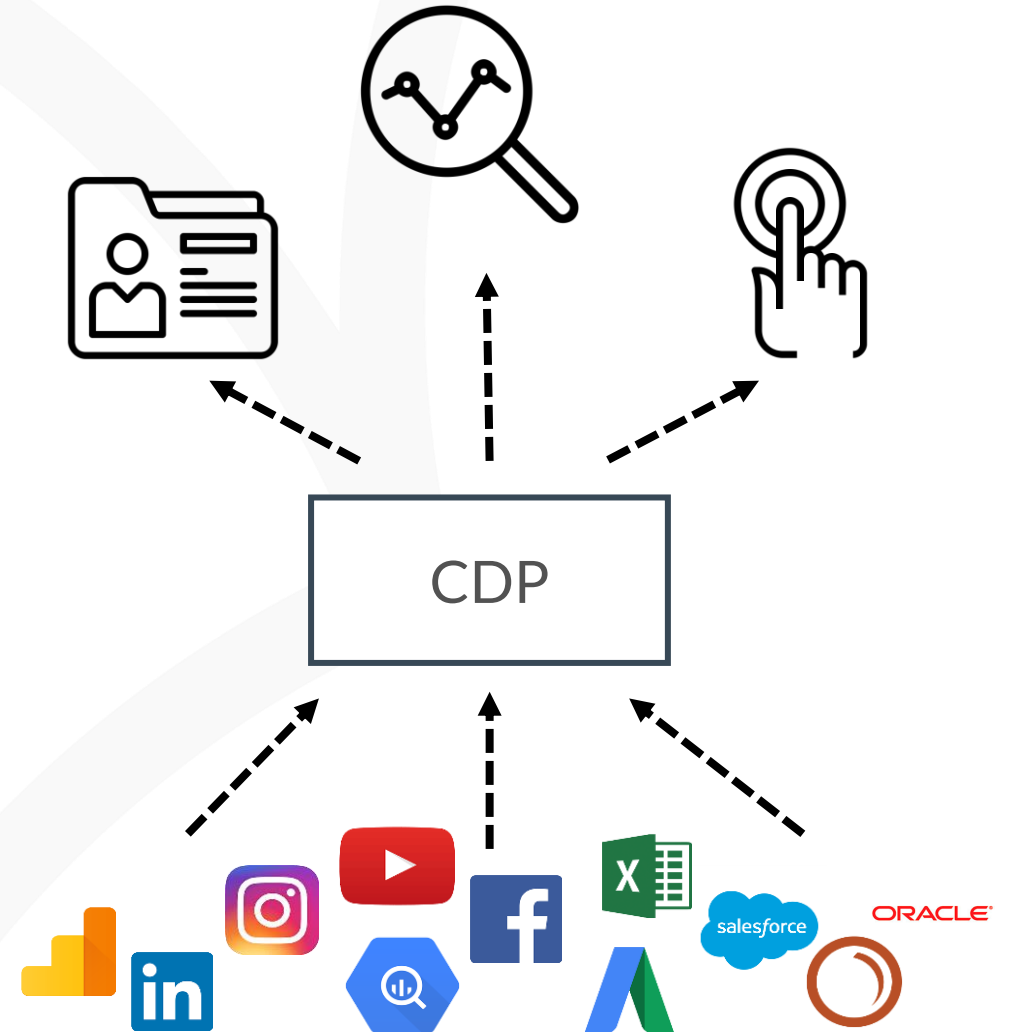

Customer Data Platform.

CDP – What

A **Customer Data Platform** enables you to

- **Collect** data from every customer touch point;
- **Unify** profiles and store customer data at maximum granularity in one place;
- **Discover** audiences, personas and customers' insights;
- **Activate** feedback to tools, platform and people to improve strategies and operations.

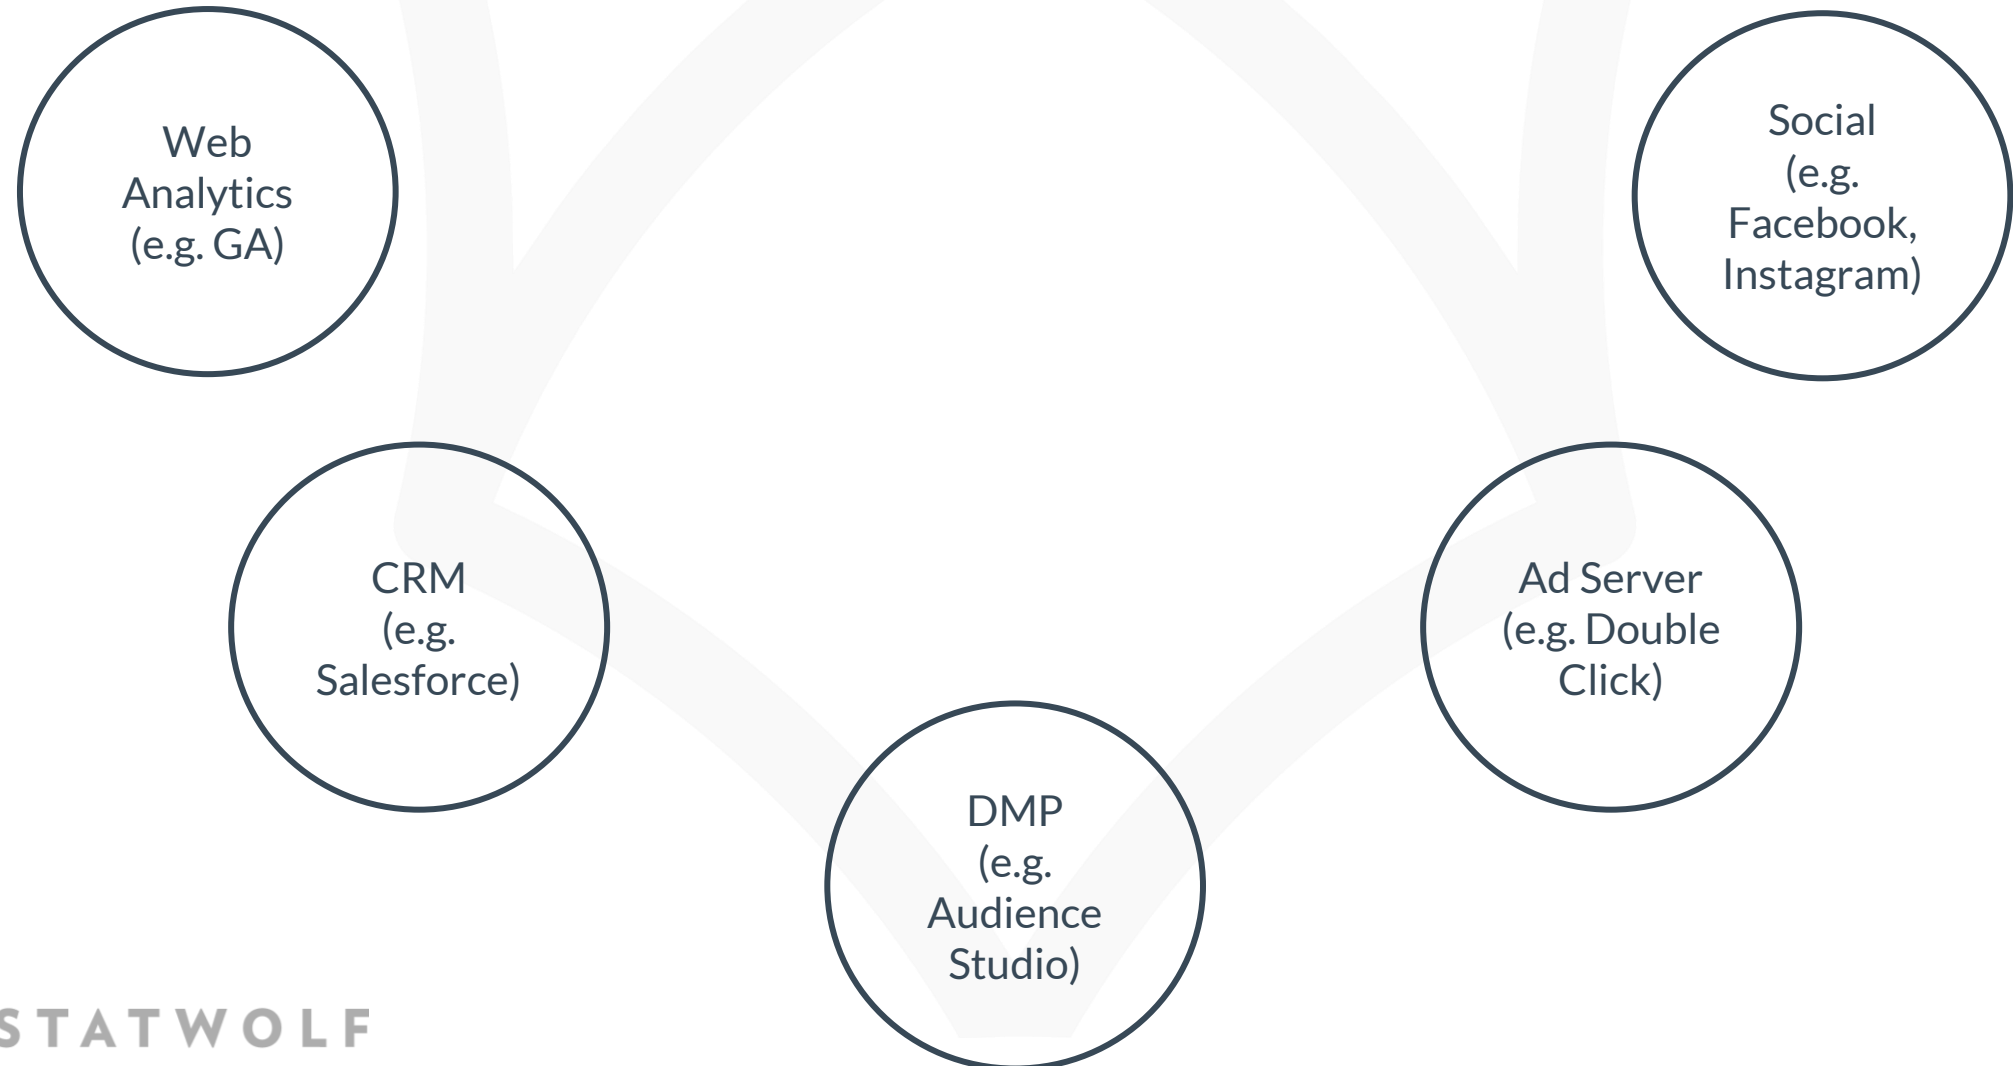

CDP – Why

Single Customer View and Sales Enhancement

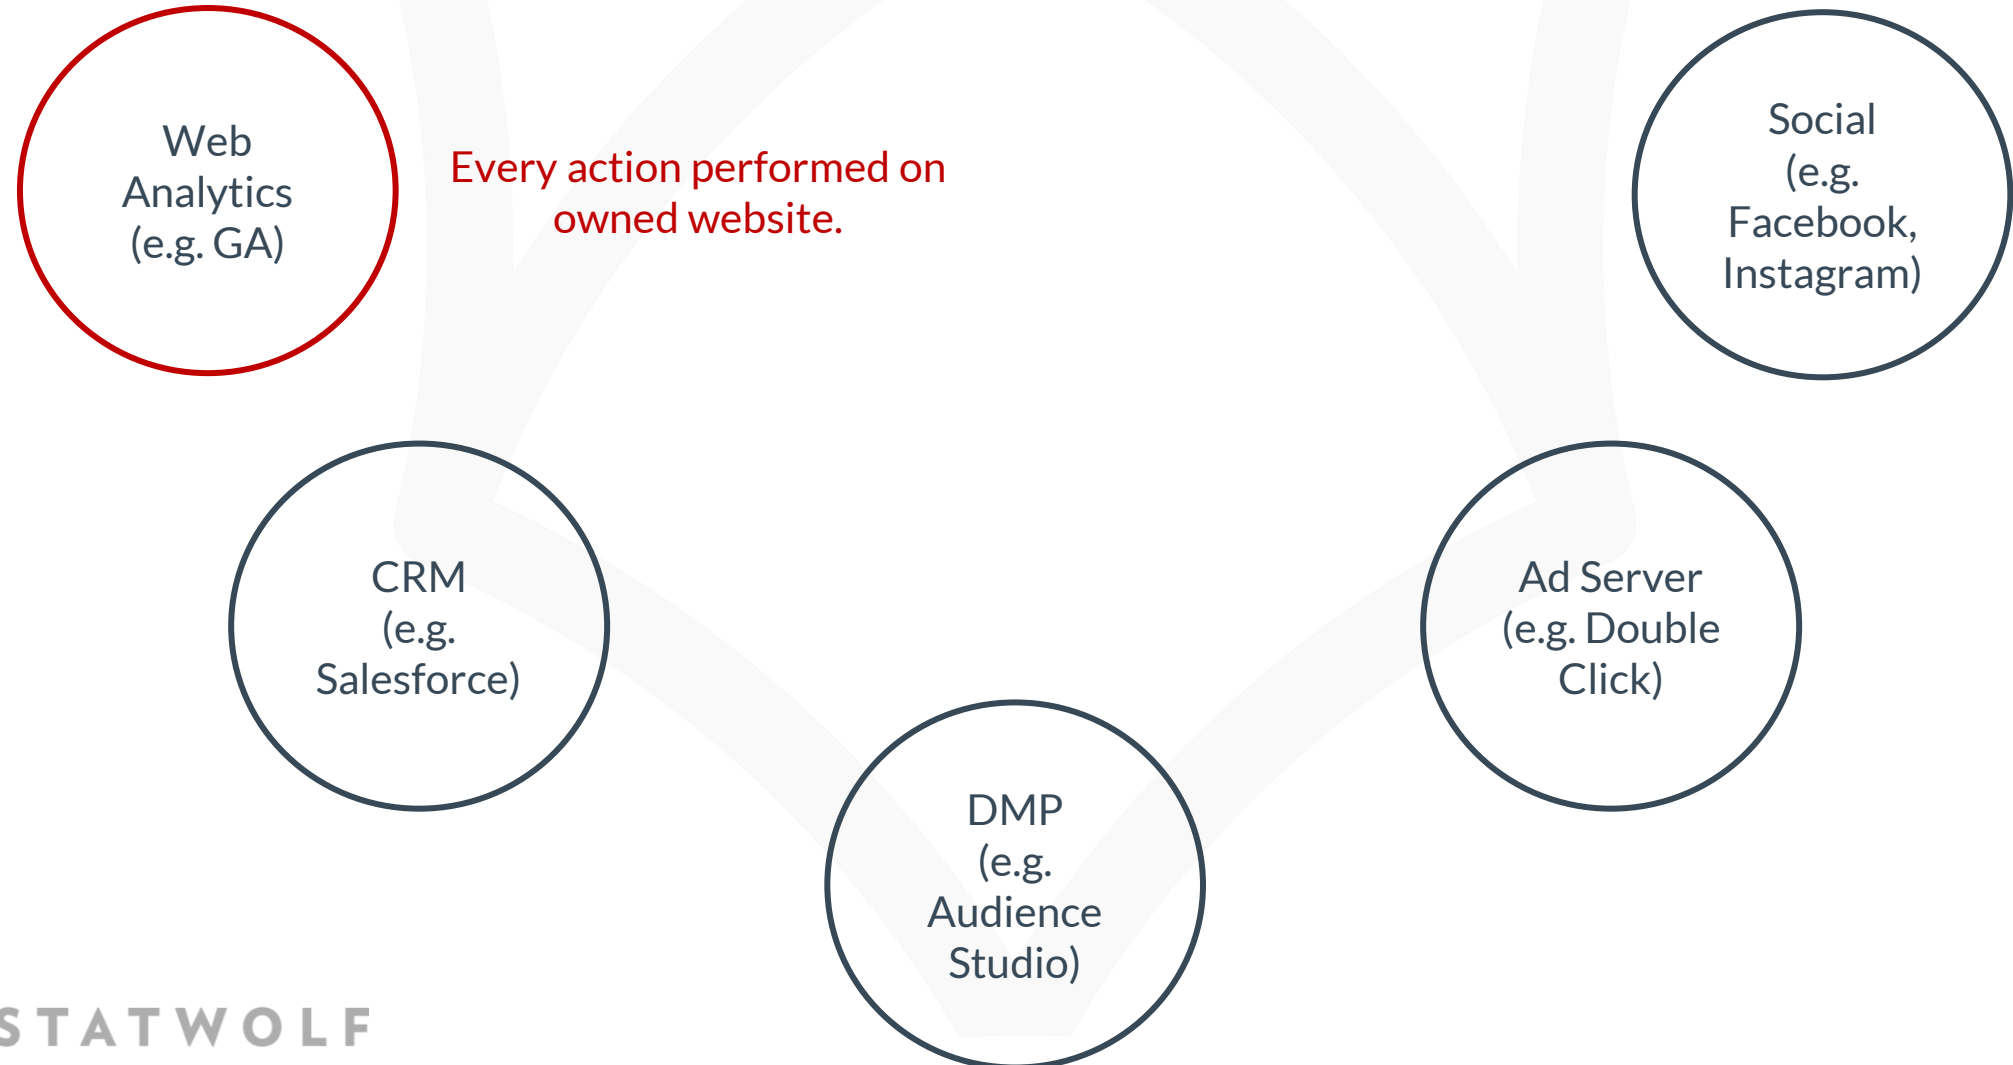

Buyer personas, Customer Journey and Attribution modelling

Audience creation and Personalization

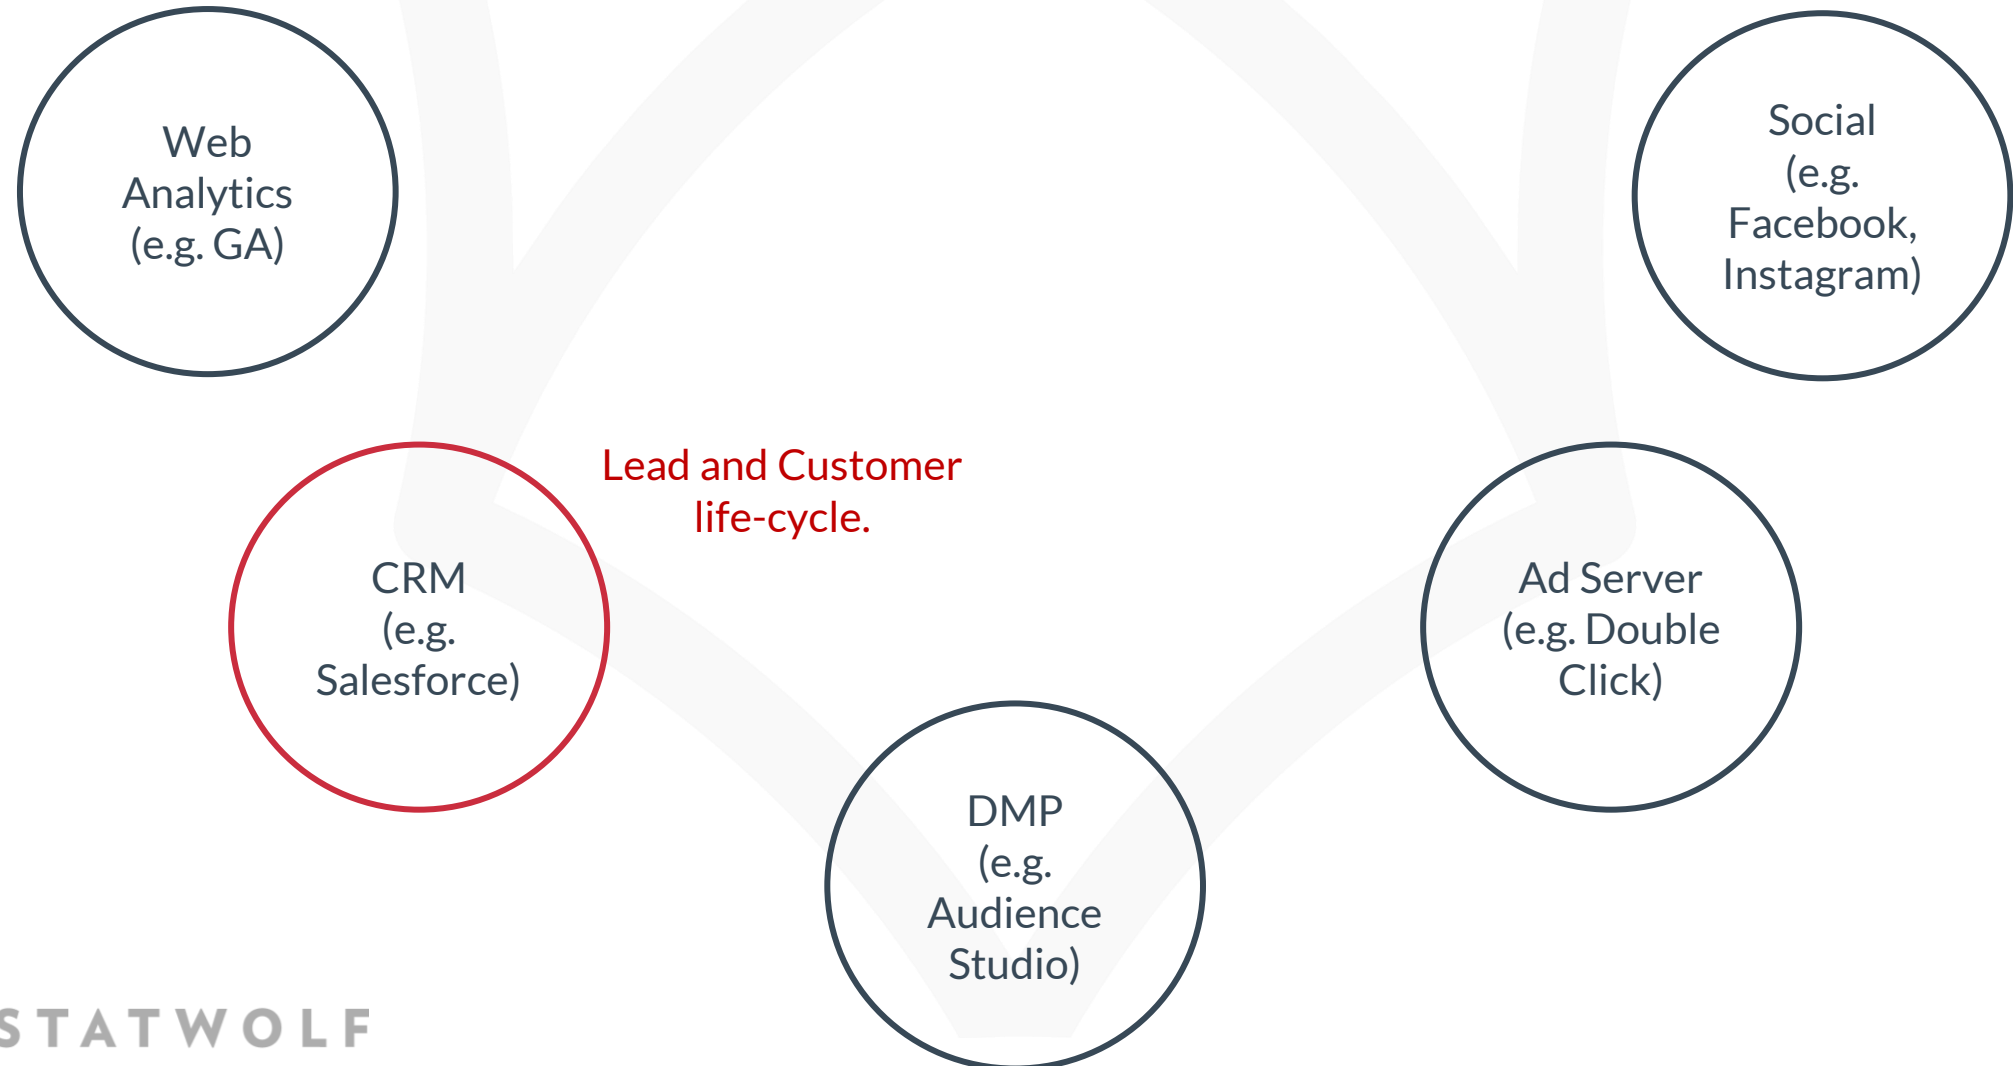

CDP – Where
