# Automated solutions for Infra, Cost, Migration Assessment and Management using Artificial Intelligence (AI) & Machine Learning (ML) technologies.

**Microsoft Azure**

Click2Cloud™, a Multi-Cloud Management Company, delivers a comprehensive multi-cloud management platform.

**CloudBrain**, a unified interface platform through which administrators and users can easily view and control a multi-cloud environment from a single interface to optimal toolset for cloud migration needs, accelerating resource provisioning, providing tools for tracking usage and costs, optimizing cloud usage, offering automation using custom-built templates, and comparing different services across leading cloud providers.

## WHAT WE OFFER

**Cloud Compare** helps businesses who are planning to move their applications from on-premise/cloud data centers to cloud to cut down the cost on infrastructure management and increase agility. Different type of Assessments: Infra, Pre-Migration, Cost Calculator, Cloud Compare, Cyber Security.

**Migration Studio** provides users with cloud to cloud, virtual to cloud, database to cloud, storage to cloud, infra, physical to cloud, virtual to virtual migration scenarios. CloudBrain's migration feature helps user to perform migration related operations seamlessly and more easily.

**Storage Manager** offers object and block storage for a single clustered platform. has built features like multi-cloud for GCP, CEPH, AWS, S3, Azure, Huawei, Alibaba, IBM, OTC as storage back-end.

**Cost Manager** helps to cut back on spending and illuminates the process to gain better perceptibility and efficiency. With this tool, an organization can save overall cloud cost Management, Billing, Optimization and budget management; to drive Process automation on governance, visualization, cost ownership, to deliver precise TCO (total cost of ownership).

## WHAT OUR CUSTOMERS ARE SAYING

"I can vouch for these guys. They have a legit Solution and are quick at responding and moving forward on things."

**– Travis Wright, Principal Project Manager, Microsoft**

# Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.

## WHY AZURE

### Be future-ready

Continuous innovation from Microsoft supports your development today and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise-grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data science tools.

### Build on your terms

You have choices. With our commitment to open source and support for all languages and frameworks, you can build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support for Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

### Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single identity platform trusted by 90 percent of enterprises globally.

### Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With its $1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.
