

How SmartShare works?

Setting the standard for securely sharing medical data within the healthcare industry

SmartShare is Efferent's image share technology that will transform the efficiency and the speed of image exchange in everyday referrals, trauma transfers and second opinion collaborations.

Eliminate C.D. Burning!

SmartShare connects healthcare facilities, providers and patients for quick, convenient, cost-effective and secure sharing of medical images and diagnostic reports—anytime, anywhere.

Clinicians need instant and secure access to images, patient data and powerful diagnostic tools—all within their preferred workflow. SmartShare meets these demands.

SmartShare is a highly secure hybrid cloud-based FHIR platform that enables the secure exchange of images and patient data across organizations, desktops and mobile devices.
