# Create Advanced Enterprise Applications the Easy Way

## KnowledgeKube is the fastest way to develop highly connected enterprise applications for the Web, Windows, iOS and Android

More and more organisations are now looking to achieve digital transformation, but with a global shortage of IT development resource, so called digital transformation experts over complicating the process, and business pressures dictating the utilisation of existing legacy systems, how can this be effectively and efficiently achieved?

Our Rapid Application Development platform makes it easy to fully enable your digital solutions, whilst also empowering them to evolve with you, your business and sector markets, as and when they do. A truly cost effective, future-proof approach to business applications.

Create fully-featured applications for customers and employees alike, whilst seamlessly providing the ability to handle huge amounts of data behind the scenes.

Not only that, but, fully surface that data later, to provide full audit trails and attain industry compliance; how, where and when you need it.

## Productivity Redefined!
### Work Smarter...
### From Concept to App Faster!

By moving away from traditional development methods, apps of any scale can be produced in a fraction of the time and cost.

Proven technology, used in over 150 countries by some of the world's biggest names

### Fast and Dynamic
Empower your digital solutions to evolve with you, your business & sector markets, as & when they do.

### Data Connectivity
Connect to, and access data from over 60 products, services & technologies straight out of the box.

### Legacy System Integration
Provide intuitive interfaces to users & optimise existing processes without the expense of developing new systems.

### Compliance & Auditability
Fully surface your data to provide full audit trails & attain industry compliance how & when you need it.

### Cross Platform Applications
Simultaneously deploy enterprise grade apps that can run across devices, without the need for app store approvals.

### Get more from your Data
Orchestrate & mine data from disparate enterprise systems together into organised processes.

### Secure Cloud Based Apps
Data & network comms. all encrypted in our ISO27001 & CESG security accredited private cloud.

# The right choice when dealing with Legacy Systems and Data

The No.1 issue for organisations who come looking for KnowledgeKube, is how to handle their legacy systems and data. Most have systems that are so engrained into their business, ripping out and replacing, just simply, isn't an option - they need a platform that can easily retain and consume these systems.

## Our current systems can't do what we need, or won't talk to each other...

KnowledgeKube is all about connecting and adding extensibility. Join your disjointed systems together, with simple out of the box connectivity, then future-proof with KnowledgeKube rapid extensibility, allowing you to keep on expanding, customising and automating with ease, as and when your organisation requires it.

## What type of systems can KnowledgeKube connect to?

The KnowledgeKube platform can connect to, and together, all types of products, services and technologies with zero programming and zero fuss. From CRM and Marketing Automation, through Accounting Systems, ERP and Collaboration, On-Premise and Cloud DBs, to all standard file formats. KnowledgeKube handles it all.

# Digitise to Revolutionise

### True Digitial Transformation

True digital transformation, isn't just about digitising a process like-for-like. KnowledgeKube allows you to optimise your processes, digitise existing manual tasks, and join processes together to see huge reductions not only in duplication of effort but also in costs.

KnowledgeKube has efficiency built into its core.

### Proof of Concepts and Rapid Prototyping

Need to prove your solutions will work? - No problem - Easily build proof of concepts and prototype and test new applications with your users - faster.
Efficiently test and refine to build more complete solutions that users will happily adopt.

# Self-Serve, or have us Create.

Get up to speed quickly to build your own applications,
or alternatively - Our Experts can work with you to
develop advanced bespoke solutions, from
small add-ons to mammoth
integrated systems.

You detail it and we will
make it happen...
