

Dedalus Cost Analysis Implementation

A complete analysis that proposes cost optimization of the Microsoft Azure environment.

This four weeks Dedalus Cost Analysis Implementation service have Cost and Consumption Control Plans, Resource Capacity Management Plan and Architecture Transformation Plan.

What is Dedalus Cost Analysis Implementation

The Dedalus Cost Analysis Implementation service has Cost and Consumption Control Plans, Resource Capacity Management Plan and Architecture Transformation Plan. This analysis proposes a model of continued governance of the environment, establishing policies, control, processes and measurements that guarantee the adequacy and forecast of costs.

This solution is recommended for all customers who need to separate cloud work environments due to different cost centers and provide a Cost Control analysis.

Dedalus Cost Analysis Implementation will ensure a cloud computing environment with costs under control through an excellent sense of planning and management.

Why customers use Dedalus Cloud Cost Implementation

Having a specialized partner to monitor and analyze the costs of Cloud Computing environments has become essential not only to ensure the success of projects, but also to ensure the best usage of the cloud itself.
