# docuflow® | SAP® Certified
Integration with SAP NetWeaver®

DATA SHEET

Unlock the Value of your SAP Content & Free Up Your Teams

Supporting SAP® ECC, CRM and S/4HANA®, docuflow® reduces costs and increases your teams' efficiency with seamless SAP archiving, linking and process automation across your Microsoft 365® platform. docuflow, an SAP certified solution combined with our Intelligent Automation Patterns, forms the basis for end to end digital automation solutions that include Accounts Payable, Onboarding, Audit & Compliance, Content & Data Archiving, Content Migrations, and Content Federation.

Microsoft 365 / SharePoint — ADD CONTENT TO CONTENT SERVICES

docuflow® ECM API Framework
- DATA ARCHIVING
- LINKING
- TASK & PROCESS AUTOMATION
- INBOUND TO & OUTBOUND FROM SAP PROCESSING
- METADATA
- CUSTOM PROCESS
- MASTER DATA
- ARCHIVELINK, DMS, CRM CM
- TRANSACTION RECORD

SAP — ADD CONTENT TO CONTENT SERVICES

Process & Workflow Automation

Bidirectional Workflow Integration
Enhanced Inbound Processing
Extended Choice Lists
SAP AuditLink

CORE CONTENT CAPABILITIES:
With docuflow, teams can see and interact with content in the platform they're used to. We connect SAP to your Microsoft 365 Platform using SAP ArchiveLink and our unique automation features including:

Enhanced SAP Document Storage	Bidirectional Metadata Syncing	SAP DMS Integration
Migration Utilities	Message Output Storage	Print List Storage
Automation API	Data Archiving (ADK)	Administrator Workbench

PACKAGED SOLUTIONS:
docuflow is a no-code solution that enables you to streamline and automate time-consuming, manual SAP processes. From automatic capture to Intelligent Automation, you can do anything from triggering SAP and content services processes to intelligent execution of complete solutions for:

Accounts Payable   Onboarding   Audit & Compliance   Archiving & Linking   Migrations   Content Federation

BENEFITS AND VALUE

Microsoft 365 & docuflow reduce costs and increase team efficiency with seamless SAP archiving, linking & process automation.

Drive Efficiencies

From automation of manual time-consuming tasks to triggering workflow processes, docuflow's intelligent "do-anything" automation capabilities drive efficiency and streamline your business inside and outside SAP.

Boost Productivity

Enable greater productivity by having business content securely at your fingertips, inside and outside of SAP. Archiving improves SAP performance, allowing teams to work faster.

No Change Management

Built-in migration & re-linking tools will get you to the cloud quickly, with no impact to your SAP users.

Lower Implementation Costs

Designed for the cloud & speed to implementation, docuflow leverages your existing infrastructure & licenses and requires minimal services to implement saving you time and money.

The VersaFile team brings over a decade of experience integrating and deploying content services applications with ERP solutions such as SAP. As a company we specialize in providing you with easy to use solutions for classifying, managing, processing, automating and integrating your business content. Call us today for a friendly conversation about your specific needs.

DEPLOYMENT OPTIONS

docuflow is designed and built for flexibility including how it is deployed and managed. Three options exist:

On-premises – docuflow is quickly installed and configured within your on-premise environment, whether that be on a virtual server, containers, or direct hardware.

Private Cloud – most common private cloud environments are supported by docuflow including Microsoft 365, AWS and Azure. VersaFile can provision a separate tenant or implement docuflow within your own existing tenant. Let us know what cloud you want, and we will validate our support for your specific environment.

Private Cloud Fully Managed Through secure connections, VersaFile deploys and fully manages your docuflow deployment within a private cloud instance. VersaFile provides monitoring and proactive maintenance and system administration for your docuflow instance. Included with fully managed services is a service level agreement (SLA) to match your specific requirements.

SUPPORTED ENVIRONMENTS

SAP PLATFORMS

- ✓ ECC
- ✓ CRM
- ✓ S/4HANA

The docuflow® story

docuflow was founded 15 years ago by a team of seasoned SAP developers. Tired of building the same customizations over and over, the team used their diverse SAP skill sets to build what is now docuflow, an intelligent content and process integration engine tightly integrated with the Microsoft 365 Platform.
