HealthEM.AI

Reimagining
Care Management

Translating AI/ML insights into last mile action through care management interventions

HealthEM.AI is a mission-driven data platform company dedicated to improving care delivery. To achieve this, we simplify patient data from all points of care and apply AI/ML based predictive analytics to empower healthcare organizations with actionable insights. We ensure healthcare organizations take the right actions to enhance patient health and optimize cost.

HEALTHEM.AI
at a Glance

Clinician built care management framework	**91% accuracy** in AI modeling	**CMO approved AI/ML insights** to augment care delivery	Funded by **Chicago Pacific Founders and Tredence Inc.**

WHO WE SERVE?

- Accountable Care Organizations
- Medicare Advantage plans
- Commercial plans
- Dental
- Vision
- Integrated delivery networks
- Medicaid plans

HEALTHEM.AI OUTCOMES

- Reduction in hospital admissions and re-admissions through AI/ML-recommended care management interventions
- Improvement in STAR ratings and Healthcare Effectiveness Data and Information Set (HEDIS) measures
- Delay in disease progression and improved quality of life for chronic patients
- Precise recommendations on how to mitigate rising costs at both the population and patient level

HealthEM.AI has allowed us to optimize our care management process and laser focus on the patients most in need of elevated levels of care. Their ability to ramp from concept to working prototype is the fastest I've experienced in this industry.

Vice President, Analytics and Finance of a Florida-based Primary Care Group
