

# Migrate to Azure

## Top features

- Business-led enterprise transformation
- Define and execute your cloud strategy framework
- Sizing based on Data Criticality Index
- Best-of-breed, industry standard products and accelerators
- In-house technology experts
- Strong partner network and strategic alliances

## Benefits of Azure Migrate + ASR

### Discovery

- Appliance-based
- Light: Non-intrusive, frictionless
- Deep: High-confidence

## Benefits

- Align IT infrastructure with business goals and objectives
- Lower operating risk with reduced complexities
- Improve resilience and disaster recovery
- Lower TCO by optimized infrastructure footprint
- Increase agility and reduced time-to-market through on-demand capacity
- Improve financial management of IT services

### Assessment

- Azure suitability
- Right sizing
- Cost estimation

# Migration Services

## Planning

Propel cloud deployments with an environment discovery, cloud assessment & architecture design to guarantee a seamless implementation

- Client-specific environment and strategy analysis
- Cloud readiness assessment
- Solution analysis, scope, and design
- Data architecture design

## Implementation

Leverage our Azure experts to ensure cloud migrations/deployments experience minimal downtime and are on-budget, on-time & aligned with business objectives

- Systems integration
- Environment architecture, service, and design
- Data center migration
- App re-platform and re-architecture
- Deployment services leveraging IaaS, PaaS, or a hybrid

## Optimization

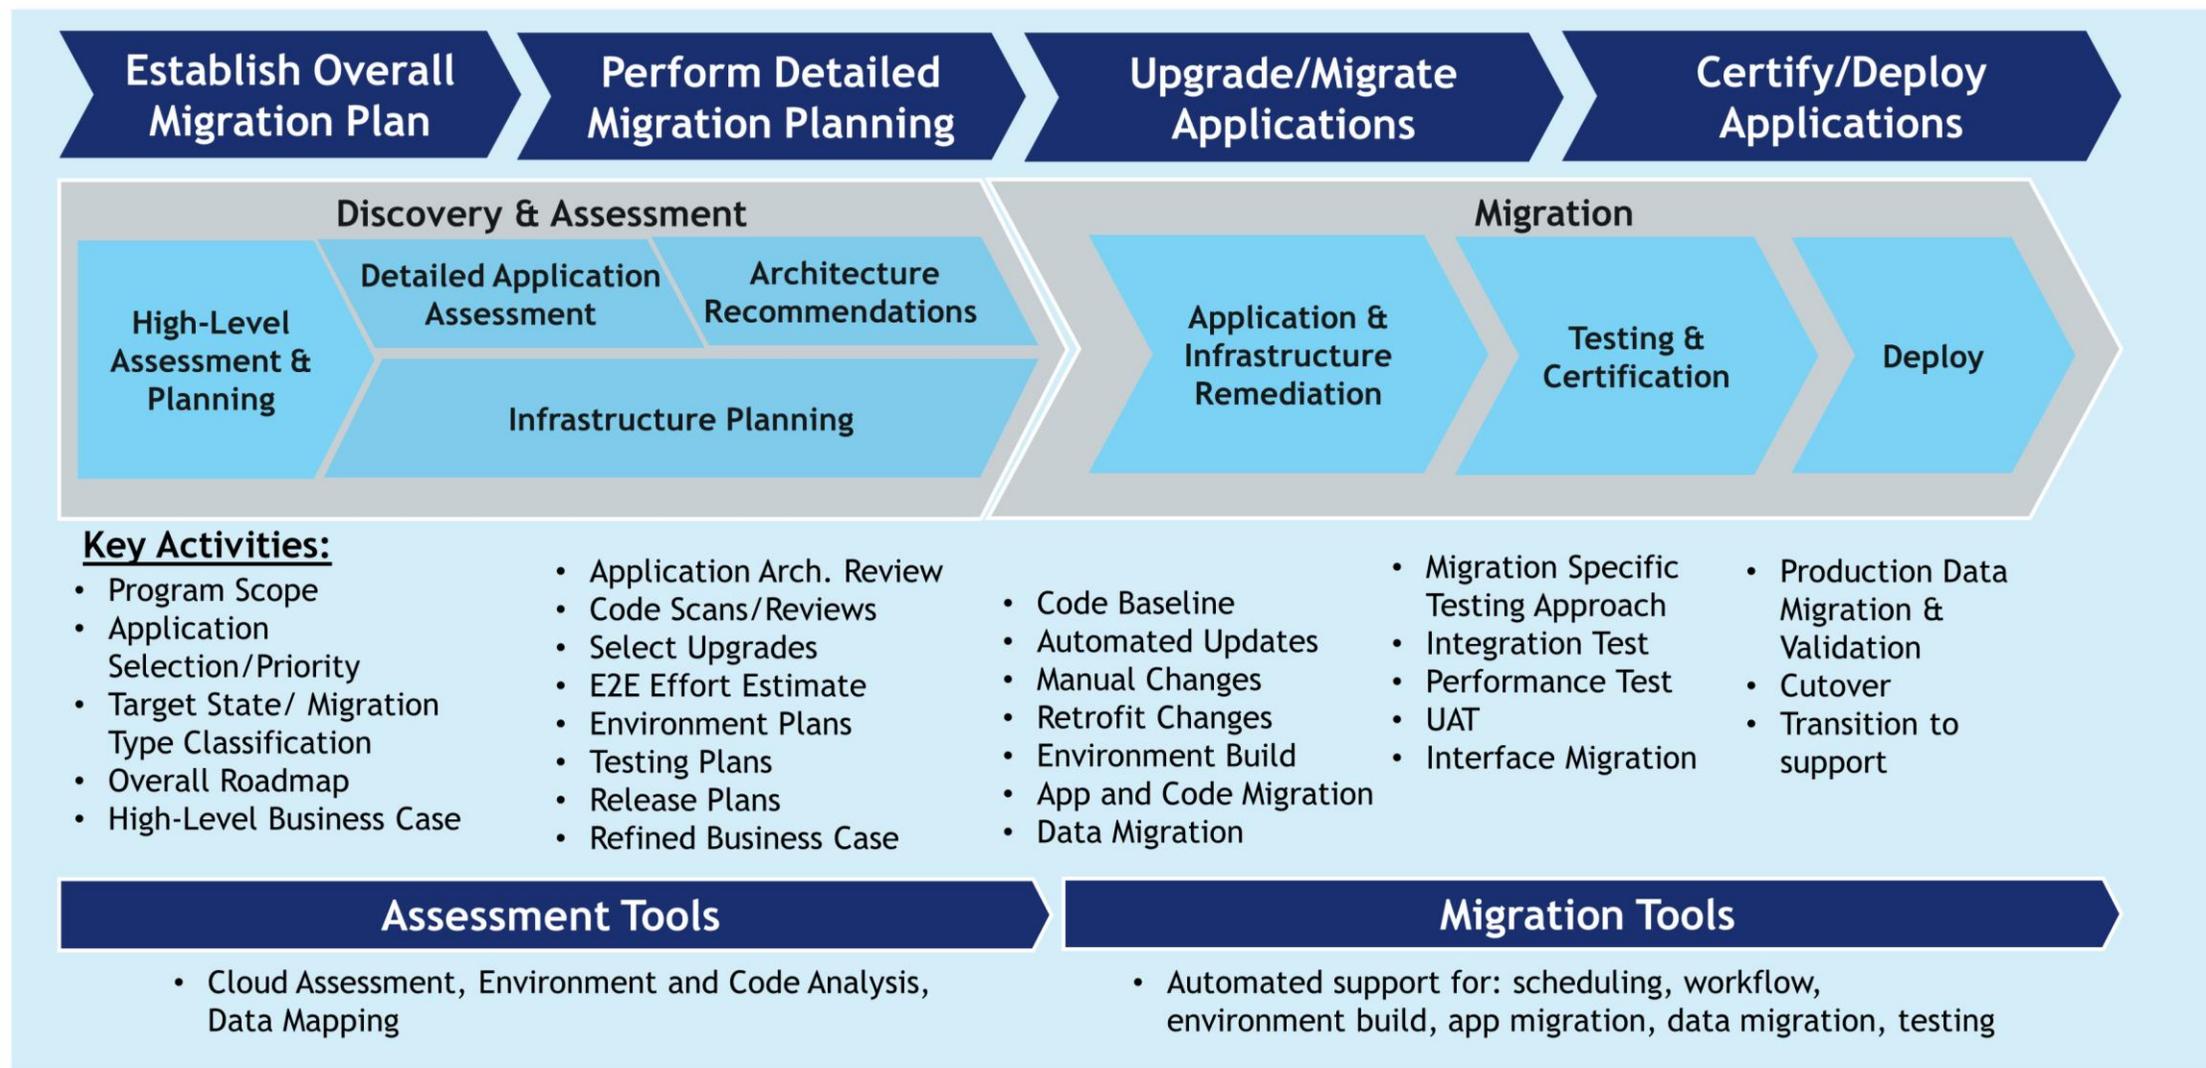

Continuously enhance your environment with business goals, leverage innovation in Azure, and utilize our cloud expertise for added efficiency & value

- Azure optimization reviews
- Backup and disaster recovery
- Security briefings and Hitachi Solutions reviews
- Release Management-as-a-Service
- Cloud usage forecasting
- DBA-as-a-Service
- Advanced ISV and cloud architecture service

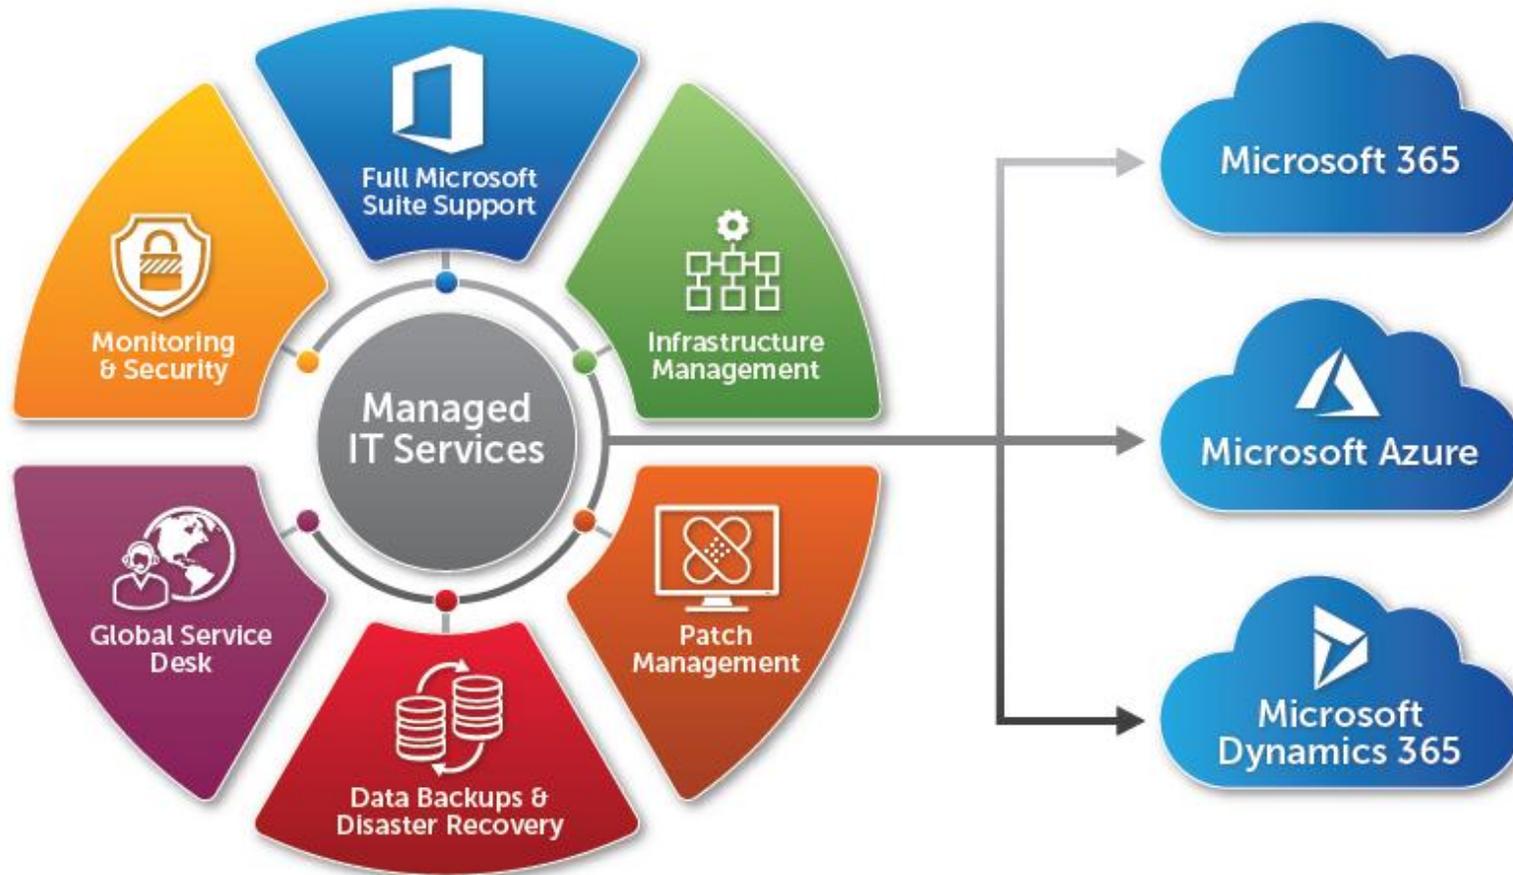

# Migration Landscape

# Migration Framework

# Azure Managed Services

Microsoft Azure is the answer for businesses facing the ever-growing cost of hosting and maintaining their own data centers. Hitachi Solutions delivers unbiased guidance on best-fit cloud solutions for organizations around the globe.

We go beyond simple migration assistance, providing infrastructure management with multi-cloud managed services, professional services, and managed application services to enable true digital transformation.
