

Microsoft 365 Business Applications

Modern applications for practical
business transformation

Gold
Microsoft Partner

Today's market requires modern experiences

Consumers demand a seamless, connected, personalized experience

Employees expect access to data when and where they need it

Data protection is essential while lines blur among storage, processes, search and analysis

Keeping up with market demands can be difficult

Paper-based processes are no longer acceptable

Legacy solutions are falling short or being deprecated

Disconnected processes cause a host of issues

To stay competitive, businesses need to increase efficiency

Introducing Microsoft 365 Business Applications

Business insights you can act on

The applications and tools your organization needs, to drive business efficiency

Native tools fully integrated with Microsoft 365 and Azure Applications that deliver the insights you need

Build with your business in mind

Build applications to simplify everyday tasks
No need for pro developers

A thriving ecosystem of experienced service providers you can rely on for solutions and help

Your future with Microsoft 365 Business Applications

Useful applications, forms, and process automation

Simplify and automate everyday business tasks

Automate common tasks without expensive dev processes

Reduce dependency on inefficient, paper-based processes by implementing a modern set of tools

Increase productivity with applications that solve real business challenges

Connect employees and processes to data

Securely collect, manage, and use data from disparate systems to provide critical insights and action

Enable anywhere, anytime, any device access to critical information

Connect employees through data driven processes

Modernize to stay competitive

Provide exceptional employee and customer experiences

Empower employees to accomplish more with less, and innovate rapidly

Reduce redundancy, waste, and inefficiency through planning and consolidation

Microsoft 365 Business Application partners helping you throughout the lifecycle

Assessment

Assessing your existing forms, apps, and workflows and planning for the future

Automation and workflow

Automating functions and services to solve common business needs

Architecture

Architecting solutions and approaches to help organizations succeed

Visualization

Reporting and analytics against business data for intrinsic and embedded scenarios

Migration

Moving existing workflows off legacy technologies, such as InfoPath, to modern solutions such as PowerApps, Power BI and Microsoft Flow

Security and compliance

Managing security and compliance of data throughout lifecycle

Data services

Planning, rationalizing, building, and protecting data repositories including SharePoint lists, SQL databases, and connecting to other data sources

Packaged solutions for common functions

Packaged solutions that meet a standard, common set of needs

Custom development

Custom applications to meet your specific business requirements

Education and training

Educating and training your team on how to use PowerApps and other Microsoft 365 tools with SharePoint
