

Backup & DR: 2-Days Workshop

Primary Product: Azure

What is it?

This workshop is a comprehensive training program designed to help IT professionals gain the knowledge and skills necessary to successfully implement and manage a backup and disaster recovery (DR) system on Microsoft Azure. The workshop covers a variety of topics such as the fundamentals of backup and DR, planning for a backup and DR solution, implementation of a backup and DR solution, and management of such a system.

Who is this for?

This service is suitable for IT professionals and administrators who are responsible for the planning, implementation, and management of a backup and DR solution.

Backup & DR: 2-Days Workshop

Primary Product: Azure

What are the benefits?

The benefits of this workshop include:

- in-depth training on backup and disaster recovery,
- the ability to develop a comprehensive backup and DR plan,
- knowledge of how to implement and maintain a backup and DR system,
- gaining the skills necessary to troubleshoot and resolve backup and DR problems.

Outcomes of the workshop

At the end of the workshop, participants will:

- have a clear understanding of the fundamentals of backup and DR,
- be able to develop, implement, and manage a backup and DR solution,
- at the end of the workshop, participants will have a complete understanding of backup and DR and will be able to develop, implement, and manage a backup and DR system.

Steps and Agenda

Day 1:

- Introduction to Backup & DR.
- How Microsoft Azure solutions can help clients to backup and recover their data.
- Planning for a Backup & DR Solution.

Day 2:

- Implementing a Backup & DR Solution.
- Managing a Backup & DR System.
- Troubleshooting & Resolving Backup & DR Problems.
- Wrap-up & Questions.
