

CLOUD FUNDAMENTALS FOR
DECISION MAKERS

Is your organization taking first steps to cloud? This one-day workshop goes through the essentials you as a business decision maker need to understand about the cloud in general, and Microsoft Azure especially. We brief you about the basics and focus on the matters you need to know when implement, buy or evaluate public cloud as an option.

WHY

- First considerations I need to apply when moving my organization to cloud
- Ability to estimate and control costs related to cloud
- Understand the common pitfalls
- How to take advantage of new business opportunities?
- How does the cloud differ from the traditional data center?
- Is there ready services which I can use instead of my own
- What to do about vendor lock in

CONTENTS / CLOUD FUNDAMENTALS FOR DECISION MAKERS

TOPICS COVERED DURING THIS TRAINING

- Learning the very essentials of cloud, which you need to successfully talk within your organization and vendors about cloud projects
- Understanding of the cost and subscription and licensing model of Azure
- How others have implemented cloud and what was good and what went wrong
- Things what you need to have in place to start operating in the cloud
- Understanding how you can manage cloud spend
- Readiness to identify new business opportunities enabled by cloud in your business through examples and discussions.
- Speed of change in the cloud and how to manage that
- Leveraging the existing services in cloud instead of building them yourself

WHAT WE EXPECT FROM YOU

- Curious mind and attendance
- Lots of questions
