

# Cloud Platform Services

Hybrid integration for modern applications!

## What are Cloud Platform Services?

We offer custom software development for business applications that can run entirely in the cloud, or hybrid applications that run both on premises and in the cloud.

Using Logic Apps, Azure Functions, API Management and Service Bus, we can design and enrich existing on premise applications by rapidly adding new features and capabilities to support new business. By using the Cloud, we can build "serverless" solutions that allow you to scale on demand and "pay for what you use". We can also build SaaS (software as a service) applications that can run entirely in the cloud.

## What we do?

Certified in Azure app development

Creative programmers designing scalable solutions

Experts in connecting on premise systems to the Cloud

Conduct Cloud Assessments to better understand your needs

Provide Operational Analytics via Application Insights and Power BI

Develop EDI applications that run entirely in the Cloud

Provide cloud management and monitoring services to reduce down time

## Why Enkay?

We are a certified **Microsoft Gold Partner** for Application Integration.

Our developers are well trained in Azure applications development, and have experience in all aspects of application life cycle management.

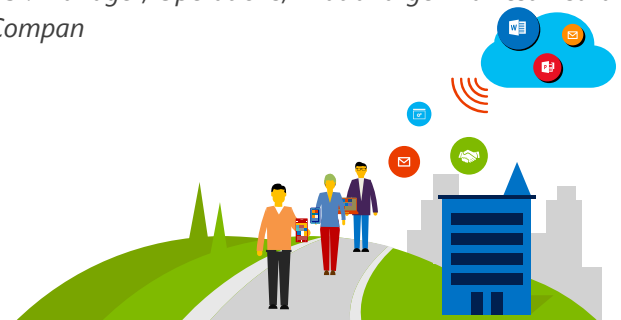

As integration specialists, we have a proven record of successfully helping our customers reduce operational costs, improve efficiency and meet uptime SLAs by recommending changes based on best practices that we have curated over multiple successful engagements.

Our cloud services will allow you to meet your operational SLAs while allowing your end users to focus on your core business

**"Appreciate all your hard work and contribution to the quick resolution of some of our Ops related problems!"**  
- Sr. Manager, Operations, IT at a large Midwest Insurance Company
