

# Stay ahead of threats. Get the latest security recommendations

## ABOUT AMESTO FORTYTWO

We are Fortytwo and solve our customers challenges. We are the solution. We are technology. Using the best tools to ensure our customers can rely on their operations, safely, securely, in the cloud. We will find the answers. And the questions.

### See what customers are saying:

Since implementing the Amesto Fortytwo Security Posture Portal, our team has witnessed a dramatic shift in how we approach and handle our security configurations.

- Andre Hornæs, IT Operations Manager, Fana Sparebank

A SOLUTION THAT MONITORS YOUR MICROSOFT 365 CONFIGURATION AND COMPARES IT TO BEST PRACTICES

Introducing Amesto Fortytwo Security Posture for Microsoft 365, a solution that continuously monitors your Microsoft 365 configuration and compares it to best practices.

All your Microsoft 365 configuration with possible improvements will be reported with an explanation of why we check for this, an explanation on the consequence of following that best practice is, and a detailed guide on how to configure your environment in a best practice manner.

### WHAT DOES THIS SOLUTION SOLVE?

We see a lot of customers that are managing their own Microsoft 365 tenant – which is great. However, many of these customers only have knowledge about 20 to 40 percent of Microsoft 365, while the rest is running happily on default settings. This might have been good enough up until now, but with threat actors setting their eyes on Microsoft 365, a 100% coverage is necessary.
