

# Sustainability Action Pack

## Guiding your sustainability journey

Based on Microsoft Teams and Power Platform

# Background

Changing the world requires transparency and measurable goals

International agreements obligate organizations to take action.

Examples

- **The Paris Agreement**, international treaty on climate change
- **Agenda 2030** by the United Nations
- **Sustainable Energy and Climate Action Plan (SECAP)** by Covenant of Mayors for Climate and Energy

Both public and private sector organizations are participating by updating their Sustainability Action Plans; defining their sustainability goals and building the necessary processes to measure and manage the metrics to reach our shared targets.

# Sustainability Action Pack

**Sustainability Action Pack is a collaboration solution providing you the tools to drive environmental actions, make progress transparent and help you reach your targets.**

Solution is based on Microsoft Teams & Power Platform.

Low-code implementation approach enables easy customizations, integrations and maintenance.

Microsoft Teams + Power Platform

Sustainability Action Pack

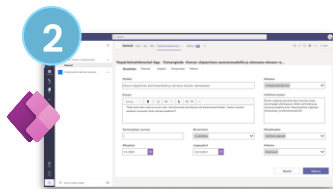

# Sustainability Action Pack

## Components

### 1 Power Apps Model-driven App

Powerful user interface for admins

### 2 Power Apps Canvas App

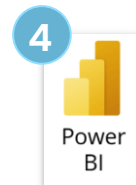

Easy to use application for end users who manage and update the actions, tasks and metrics

Available within Teams so that all functionalities such as alerts, documents, discussions and mentions are conveniently available in a single location.

### 3 Power Automate

Automations including alerts about the deadlines, approval flows, collecting data, notifications about events such as comments on the portal site and much more...

### 4 Power BI

Powerful analysis of all metrics with self-service analytics possibility

### 5 Power Pages

Web portal for communicating progress to citizens and related stakeholders.

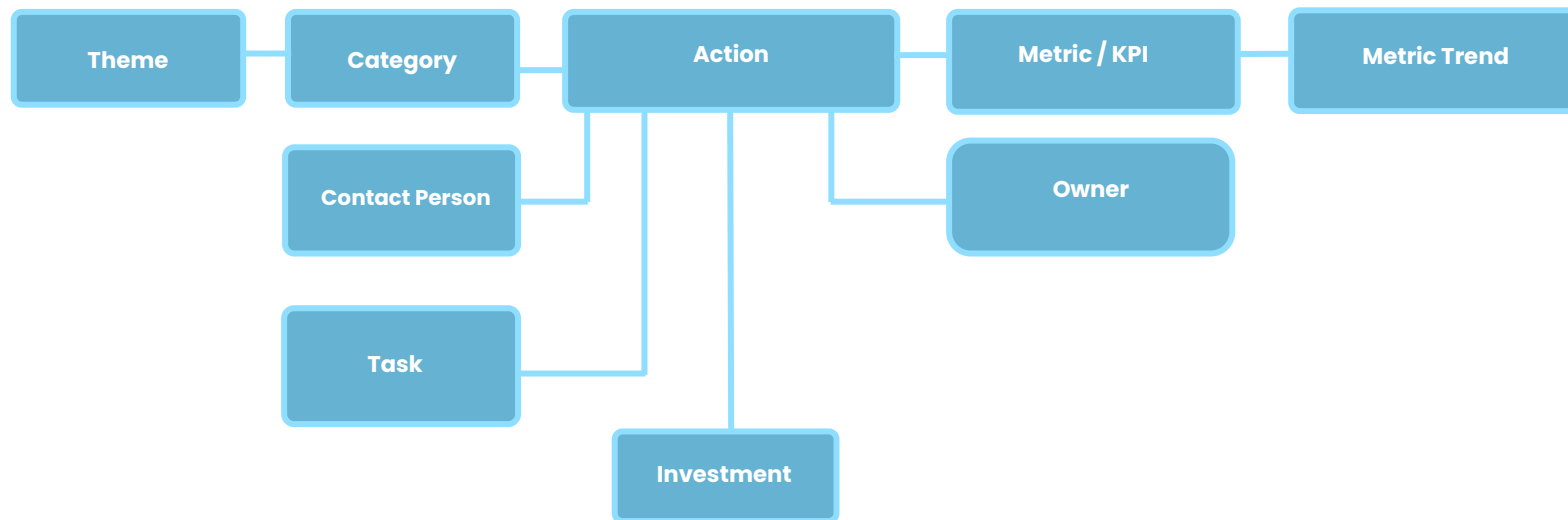

### 6 Dataverse

The ultimate smart, secure, and scalable low-code data platform

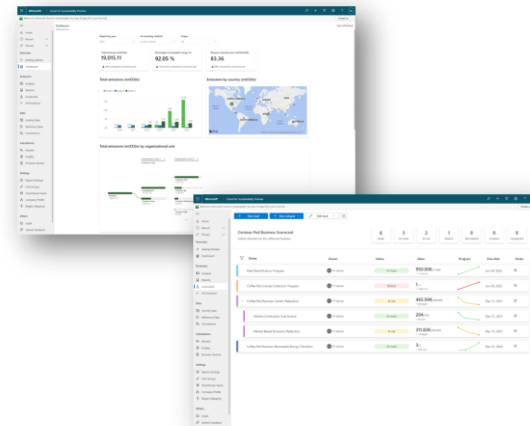

# Conceptual Data Model

Extensible

# Designed to be compatible with Microsoft Cloud for Sustainability
