

Lutech
Citrix & Azure for
Digital
Workspace

Provide a digital workspace, improve flexibility, delegate IT responsibilities, reduce costs and IT assets, comply with security best practices & privacy regulations

Challenges

Does business line demand digital workspace and more flexibility?

Are cost constraints, security threats and GDPR compliance, your nightmares?

Have no idea about next steps?

Is there an integrated solution for the digital workspace?

"Flexibility" and "on-premises" cannot coexist!

How GDPR and security compliance impact on my organization?

Ideal Solution

Ideal solution has:

Optimal User experience;

Most advanced technical features;

Consultants who help to find the perfect blend with these two ingredients.

Do you think that

- your staff does have the skills to face those challenges with method and organization?

- your staff has the possibility to focus on such a solution?

Desired Outcomes

Lighten your data center from fixed costs by deploying "workspace" workloads to the cloud.

Delegate to the cloud provider part of the responsibilities for security and compliance.

Gain flexibility by using cloud resources only when needed.

Users can work any time, from anywhere, from any device, securely as if they were in the office.

Take benefit of cloud security services to meet compliance and security targets.

Extend your cloud assets (and pay them) only when needed.

Lutech Citrix & Azure for Digital Workspace

Your digital evolution partner.

More productivity

Your employees can respond quickly to job requests from their Citrix Digital Workspace

- Anytime
- Anywhere
- From any device
- Securely

More flexibility

Your IT assets and Citrix Workload can easily be extended to Azure

- In minutes, in the event of unexpected work peaks
- Temporarily, in case of seasonality
- Pay only for what you use.

More savings

Less CAPEX to operate IT infrastructures

- Reduce your datacenter fixed assets costs by migrating workloads to Azure
- Save money with "pay as you go" or "instance reservation" options.

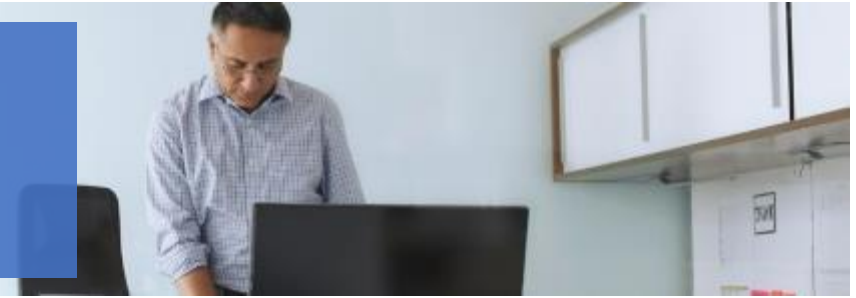

More security & compliance

Take benefit of Azure security

- Data security: data encryption, embedded data replication, managed disks, backup service...
- Availability: availability sets, load balancers, redundant gateways...
- Access & identity: MFA, audit logs...

We integrate the most innovative technologies delivering the highest performance to our clients.

Lutech Citrix Digital Workspace on Azure

- Build your digital workspace without initial investments.
- Cloud adoption can switch the costs from CAPEX to OPEX, as all Cloud Services are paid as “subscription” or “pay as you go”.
- Thanks to technical-commercial agreements, Azure is the best Cloud platform for Citrix Workloads.

Solution Alignment

Lutech + Citrix & Azure means the best digital workspace ever.

Best user experience along with security and control.

Best tools to enable workspace, best tools to base it on and protect it. Together.

Lutech + Citrix & Azure means lowering TCO

Migrate your Citrix and IT environments to cloud.

Use your money to achieve your business targets, instead than for operating your datacenter.

Lutech + Citrix & Azure means flexibility on demand

Extend your workload in minutes, to face work peaks.

No investments needed: pay only what you use.
