

Azure Cloud-Native App Innovation: 2-week Assessment

Gold Datacenter
Gold Data Analytics
Gold Cloud Platform
Gold DevOps
Gold Application Development

INNOVATE WITH AZURE CLOUD

WHY YOU NEED A CLOUD-NATIVE APP ASSESSMENT?

- Understand how to build resilient, secure, reliable, and efficient solutions in a cloud-native way.
- Be prepared for future modernization.
- Have a design and an actionable roadmap of innovation.

EASY STEPS TO MAKE A REVIEW SUCCESSFUL

- 1 Introduction to Cloud-Native paradigm
- 2 Assess the current state of the solution and migration options
- 3 Conduct technical interviews with SME
- 4 Design high-level roadmap for application modernization
- 5 Results presentation with recommendations and define next steps

ABOUT THE ASSESSMENT

The Cloud-Native App Innovation Assessment is designed to modernize your workloads according to the latest set of Azure best practices and industry standards. Our experts will work together with you to define an innovation approach, they will go through all five pillars of Azure Well-Architected Framework: Cost Optimization, Operational Excellence, Performance Efficiency, Reliability, Security; will make a trade-off analysis and provide you with a design document and high-level implementation roadmap that you can follow to make your solution cloud-native and modern.

IN 2 weeks, YOU WILL GAIN

- App Innovation Architecture Document with actionable recommendations and defined further steps
- High-level implementation roadmap for application modernization
- Understanding of Cloud-Native apps and Well-Architecture Framework based on your solution
- Estimated budget for the following steps

Cost Optimization

Operational Excellence

Performance Efficiency

Reliability

Security
