With Atlas Edge, you can realise a **low-latency, ultra responsive connection** between your equipment and the cloud.

It cuts down the distance between your machines and the cloud to insignificance and enables the next step into the industrial IoT.

Alongside data lakes and cloud infrastructure, edge computing solutions and data crunching ability allow Atlas to bring the fourth industrial revolution (4IR) to you.

Connects your machines to the cloud

Features	Benefits
Connect	Bring your equipment to the IoT.
Container	Expand and deploy computing capabilities.
Data processing	Secure, real-time, low-latency.
Supervision	Resource monitoring and alerting.
