

DIGITAL INNOVATION ACCELERATOR APP & PORTFOLIO MODERNIZATION

Accelerate your portfolio innovation and app modernization strategy.

In today's fast moving and dynamic market, effective cloud adoption is key to a successful digital transformation and business growth. Increasingly, customers are updating older software for modern approaches, frameworks and cloud platforms. In some instances, customers elect to innovate from scratch, or develop greenfield solutions. This practice means taking existing applications, in their current form (most likely, legacy and monolithic) and transforming them into something that is more agile, elastic, highly available and in the cloud.

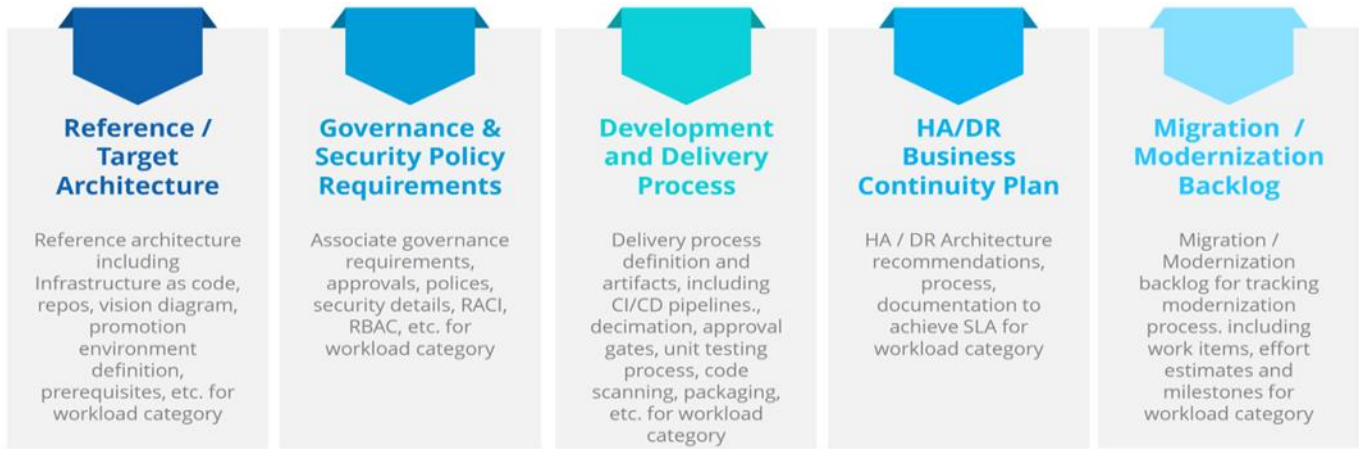

Transforming a business into a modern enterprise is both strategic and challenging. To that end, InCycle packages 20+ years experience and advanced tooling into every customer engagement. The result allows customers to leverage InCycle's industry expertise and proven approach to help customers navigate strategic portfolio innovation initiatives.

Digital Innovation Platform

1. 360-degree view. Modernization status visibility and scoring. Single source of truth for all workloads.
2. Helps teams develop strategies and priorities based on context and business value — and not just infrastructure.
3. Rapid adoption and implementation through app innovation and workload templates.
4. Innovation platform included at *no cost* in all modernization engagements.
