

# POWER APPS DEVELOPMENT: 3 DAYS ONLINE WORKSHOP

Jump-start your development of PowerApps to solve real business case during 3 days workshop.

Microsoft tools offer many possibilities for solving complex business challenges with low-code applications. To test those possibilities on real business scenario in a very short time - 3 days workshop is your next step.

As a result, you will get a prototype of application, built by you with experienced architect recommendations and guidance. This application will cover the business scenario you choose. Also, you will get an overview of Microsoft low-code tools (Power Apps, Power Automate, Power Virtual Agents) for your business automation and transformation.

## Agenda:

### Day 1 (2 hours):

- Power platform capabilities overview
- Use cases demonstration and business scenario selection

### Day 2 (2 hours):

- Designing a solution
- Prototyping solution in test environment

### Day 3 (2 hours):

- Developing and polishing the solution
- Discussing and presenting the results

*The whole project can take up to 5-10 working days, depending on your business scenario and availability.*

## Deliverables:

- Business application prototype in your environment
- Solution architecture diagram
- High-level Roadmap and budget estimate (if applicable)
- Internal team trained on real experience
