

Rackspace Elastic Engineering for VMware

Re-imagine what is possible with VMware.
Providing expertise and management for VMware
environment - anywhere

Planning your cloud strategy? Need to optimize costs without sacrificing functionality or adoption speed? Leverage an assigned team of VMware experts that works with your team to help optimize workloads, take advantage of powerful VMware attributes including cloud native capabilities and accelerate innovation across your VMware environment.

Whether you're on a transformation journey or simply looking to get more out of your VMware investments, Rackspace Elastic Engineering for VMware is designed to work with your team at every and any stage — when you need expertise the most. We'll help you unlock the full power of the VMware and the cloud, break free of the constraints of traditional cloud consumption models and drive transformation to support both traditional and cloud native workloads.

Rackspace Elastic Engineering for VMware is on-demand cloud engineering and support that enables you to innovate on VMware faster and:

- Use a flexible pool of expertise hours simultaneously across workloads.
- Streamline your cloud spend and achieve economies of scale.
- Access the same team of certified experts at each stage of your cloud journey.
- Migrate and optimize workloads faster one or many workloads at a time.

Highly Collaborative, Consumption-based, On-Demand Agile Support and Engineering Model Designed to Help You Get the Most From Your VMware Investment

Rackspace Elastic Engineering for VMware will enable you to scale your IT organization in an agile world, transform your VMware environments, and streamline your operating models. As your IT organization breaks down the traditional build and operate barriers and opens up new possibilities to accelerate innovation.

There are no support tickets to submit and no SLAs to check. Elastic Engineering for VMware allows you to simply work directly with your assigned teams of multi-disciplinary and highly skilled experts as you would your own team. You can work collaboratively to set sprint-based projects and long-term goals that move your application environments and results forward.

With Rackspace Elastic Engineering VMware, the same team of cloud experts is assigned to work with your team at any point on your cloud journey to optimize your VMware workload migrations, accelerate innovation on the cloud and retool your team

- **Beyond traditional support model:** Industry-recognized VMware expertise to plan, design, manage and optimize your VMware environment.
- **Lower operational costs:** Use a flexible pool of hours for simultaneous use across one or many VMware workloads and scale up or down as your organization's needs change, all at lower operational cost compared to the do-it-yourself approach.
- **On-demand access to experts:** Engage an on-demand team including hardware and certified professionals with expertise in all aspects of VMware and data center management.
- **Consistent team structure:** The same team of experts familiar with your goals and mission typically works with your team for extended periods of time.
- **Tap into shared knowledge and resources:** Rackspace Technology creates and shares resources, platform tools and frameworks across all our cloud expert teams to deliver the best possible know-how to customers.
- **Build a Super Team of On-Demand VMware Expertise:** Augment you VMware experts with their own expert team of certified specialist. The VMware experts assigned to work with your team include architects, engineers and technical account managers working together as one unit.
