

## **Azure Arc**

Centralized Dashboard for managing infrastructure anywhere with Wipro's Cloud Studio Services

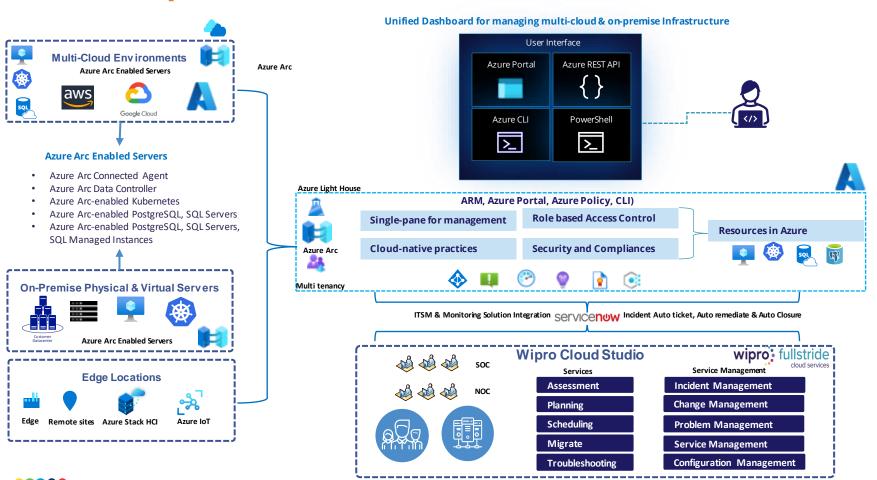

## **Azure Arc Features & Benefits**

- Manage resources whether residing on or outside Azure from Single pane of glass
- Extend Azure features outside of Azure & Apply Cloud standards outside Azure
- Set unique compliance policy across the environment
- One of the biggest upsides to using Azure Arc is that all resources associated/registered with Azure Arc send data to the main, cloud-based Azure Manager. This consolidates the information in a succinct and useful manner. Enterprises can guarantee compliance of resources registered with Azure Arc no matter where they are deployed.
- Asset Organization and inventory with a unified view in the Azure Portal across all locations
- At scale configuration and deployment based on subscription, resource groups and tags
- Azure Arc customers can use Azure Portal, Azure CLI, SDK, and 3rd party tools like Terraform to automate resource management similar to the way public cloud resources are managed.
- Can be used to solve for data residency requirements (data sovereignty)

## **Wipro's Azure Arc Solution Architecture**

## The Wipro Advantage

**Products** 

 Leaders hip Position with Comprehensive Packaged Azure/Azure Stack IaaS & PaaS Solution

Strength

- 15,000+trained, 2,500+Azure consultants
- 1,522+ Microsoft Azure Certifications
- Wipro's cloud business profile \$2.2B Cloud

**Expertise** 

 Extensive experience in Web development, Assessment, Migration and hybrid cloud architecture

**Breadth** 

Multiple Azure Engagements across industries & geographies

Wipro Full Stride Cloud Studio and EDOC Wipro FullStride Cloud Services Enterprise Digital Operations Center (EDOC) is a set of

consulting services, engineering capabilities, technology solutions and business platforms for enterprises that, together with our extensive partner and hyperscaler ecosystem, can simplify, orchestrate and accelerate the cloud journey for our clients to make progress thrive.

Center of Excellence (COE)

- Proof-of-concepts, Innovation, Tools & Accelerator
- Best practices and Architecture validations
