

Secure Remote Workplace Jumpstart

More security than ever in a distributed workforce.

Secure Remote Workplace Jumpstart

In the new reality we're facing with COVID-19, enabling staff to be productive from outside the office is more important than ever, but this opens up a plethora of security concerns. The Microsoft experts at FSi Strategies will work with you to show you how to use Microsoft 365 to enable your workforce to be productive from anywhere, on any device, and still maintain full control of your data, management of corporate owned and personal devices, and insight into your compliance metrics in real-time.

In one week you will go from zero to hero on secure remote workplace enablement with hands-on experience in a proof of concept with the Microsoft 365 security tools, enabling secure remote management of your Office 365 environment, Windows 10 devices, and both corporate and BYOD Android and iOS devices.
