Proge Azure Cloud Adoption Framework (CAF)

Define, design and prepare your Azure infrastructure, following the Best Practices of Cloud Adoption Framework and Well-Architected Framework.

During two interactive workshops (half-day each) the various stages of CAF are presented and compared with customer's environment and governance, defining the main requirements for a successful adoption, to be organized in the architectural design.

These are some of the design elements:

- Identity & Access Management
- Network Infrastructure and Internet Access (inbound/Outbound)
- Workloads Placement
- Management Group, Naming Conventions & Tagging
- Monitoring, Security and Governance

Then, the identified services and resources are deployed in the real environment.

VALUE TO CUSTOMER

- ✓ *Azure infrastructure design according to CAF Best Practices.*
- ✓ *Scalable and elastic architecture.*
- ✓ *Provide a managed and secure environment.*
- ✓ *Enables both migration and innovation*
- ✓ *Knowledge transfer to customer's staff.*

Workshops & Data Gathering → **1-2 weeks**

Architecture Design → **1 week**

Deployment → **2-3 weeks**
